Abstract: Field notes, vocabulary schedules, manuscripts, typescripts, notebooks, clippings, and printed matter relating to Merriam's work with California and other Indian tribes (1898-1938). Primary material includes lists of tribes, bands and villages of California Indian tribes; ethnogeographic and ethnographic information; and lists of Indian words and their meanings. Secondary material includes Merriam's research files containing clippings and other printed matter on Indian
tribes and Indian welfare in California and the West. Also included are manuscripts and typescripts of Merriam's published work on California Indians and typescripts of Robert Heizer's compilations of Merriam's work, published posthumously.

Languages Represented: English

Library of Congress has additional holdings of C. Hart Merriam's papers.

Photographs have been transferred to the Pictorial Collections of The Bancroft Library.
Maps have been transferred to the Map Collections of The Bancroft Library.

Acquisition Information
The C. Hart Merriam Papers were transferred from the Department of Anthropology in 1977 and 1979.

Funding
The processing and microfilming of the C. Hart Merriam Papers have been made possible by a grant from the U.S. Department of Education, Title II-C, Strengthening Research Library Resources Program.

Preface
Clinton Hart Merriam (1855-1942) was one of the great naturalists of his generation. He was the founder of the United States Biological Survey and a co-founder of the National Geographic Society. He accompanied many of the early surveying expeditions to the Western United States and for more than twenty-five years documented the natural history of the rural West. In 1910, with the support of the Harriman Trust, Merriam was able to leave the Survey and pursue his own research. While he did continue his studies on North American mammals, the primary focus of his research became the Indian cultures of California. He was especially interested in documenting and preserving the languages of California Indian tribes, which were being lost through the death of older tribe members and the assimilation of surviving members into Anglo-American culture. Merriam did extensive field work, interviewing surviving tribe members and recording their language in printed vocabulary schedules. Merriam's papers and photographs of California Indian tribes represent significant primary source materials for much cultural information, and often provide the last remaining links for many Native Americans to their ancestors.
For an assessment of how Merriam’s training as a naturalist and zoologist influenced his collecting techniques for the Indian data described in this finding aid, see Robert Heizer’s introduction to Ethnographic Notes on California Indian Tribes (Reports of the University of California Archaeological Survey, no. 68, pt. 1, p. 1-8.)

The Papers of Dr. Merriam were received over a period of several years from different donors. One of these collections (BANC MSS 80/18 c), documenting Merriam’s work on California Indians has a finding aid produced in 1969 by Robert Heizer of the Department of Anthropology at UC Berkeley, with assistance from several of his graduate students. Because this finding aid described most of the contents of the collection quite well and because the finding aid had been distributed to many institutions and individuals, it was decided to leave it largely intact. However, several cartons of material in this collection were unarranged and not listed in Heizer’s guide, although he referred to the general nature of the material in his introductory remarks. This material has been arranged and listed in its entirety for this finding aid. The listing for this collection constitutes Volume One of the present finding aid.

Volume Two consists of a consolidation of the remaining collections of the papers of Merriam. This collection (BANC MSS 83/129 c) primarily documents Merriam’s career as the founder and head of the United States Biological Survey. It includes Merriam’s personal and professional correspondence (including correspondence about his Indian work) and his papers from work undertaken by the Survey. For a fuller description of its contents, see the introduction to Volume Two.

In 1993, the Library Conservation Department of The Library at UC Berkeley was awarded a Title II-C grant by the Department of Education to preserve and improve bibliographic access to the papers of C. Hart Merriam. The Merriam project represents a very successful coordination of preservation and archival processing on a collection-wide basis. The success of this model of project development and execution has depended upon close cooperation between the staffs of the Conservation Department and The Bancroft Library. A great many Library staff were responsible for obtaining and conducting this grant project. The grant was prepared under the direction of Barclay W. Ogden, Head of the Conservation Department, by Lynn Jones, Nancy Harris, Ann Swartzell, and Sheila O’Neill. Arrangement and description were completed by a processing team including Terry Boom, Alyson Belcher, Xiuzhi Zhou, and Jane Bassett, under the direction of Jack von Euw, with consultation of William Roberts. Preservation and conservation treatment of manuscripts and pictorial material were done by Nancy Harris, Wendy Partridge, and Belay Workneh of the Conservation Department and Daniel Johnston of Library Photographic Service. Preservation microfilming of the collection was done by Charles Stewart and Alexandra Eislé of Library Photographic Service. Administrative support for the project provided by Cameron F. Olen and Louise Bradford.

The Merriam project was truly a collaborative effort for The Bancroft Library. In addition to working closely with the Conservation Department, the processing team called upon the expertise of several other individuals and departments in the Library. Special consultation and assistance with arrangement and description were provided by Mary Morganti of The Bancroft Library’s Manuscripts Division. Phil Hoehn and Fleur Helsingor of the Map Room were consulted about maps in the collection and Ms. Helsingor provided cataloging for more than fifty maps removed from the collection. As part of the Berkeley Finding Aids Project, Marilyn Sbardellati-Bolak scanned the original typewritten copy of the finding aid for collection no. 80/18 c into WordPerfect, saving hours of typing time for this complex document.

1855 Born in New York, December 5 to Clinton Levi Merriam, a merchant, banker, and member of Congress and Caroline Hart Merriam. Siblings include an older brother, Charles Collins Merriam, and younger sister, Florence Merriam. Florence married an associate of C. Hart’s, Vernon Bailey.

1872 Naturalist, Hayden Survey of the territories.

1879-1885 Received M.D. degree Columbia University. Practiced medicine for six years.

1883 Surgeon, S.S. Proteus Arctic Seal Fishery from Newfoundland.

1884 Mammals of the Adirondacks published.

1885-1910 Appointed Special Agent in charge of Economic Ornithology under the Division of Entomology of the Department of Agriculture. This division evolved into the U.S. Biological Survey, of which Merriam was named chief. He held the position for twenty-five years.

1886 October 15. Married Virginia Elizabeth Gosnel.

1889 U.S. Biological Survey to the San Francisco Mountains, Arizona. Merriam developed the life zone concepts.

1891 U.S. Biological Survey of Death Valley, California. Merriam revised and expanded the life zone concepts.

1891 Appointed by President Harrison to a commission to investigate the problems of pelagic sealing in the Bering Sea.

1891-1892 President, Biological Society of Washington.

1898 U.S. Biological Survey of Mount Shasta, California.

1899 Harriman Alaska Expedition.
1900-1902 President, American Ornithologist’s Union.
1905 "Indian Population of California" published.
1907 "Distribution and Classification of the Mewan Indians of California" published.
1910 Resigned from U.S. Biological Survey. Began biological and ethnological investigations with financial support from the E. H. Harriman Fund. Ethnological work was primarily with California Indian tribes. Continued until 1936.
1910 Dawn of the World published.
1917-1925 Chairman, U.S. Board on Geographic Names.
1919-1921 President, American Society of Mammalogists.
1920-1921 President, Anthropological Society of Washington.
1924-1925 President, American Society of Naturalists.
1928 An-ni-k-a-del, the History of the Universe, as told by the Modes-se Indians of California published.
1931 Received Roosevelt Medal "for distinguished work in biology."
1942 Died in Berkeley, California, March 19 at age of eighty-six.

Introduction
Between 1902 and 1935 Dr. Clinton Hart Merriam was engaged in the ethnological study of American Indians, mainly those in the western United States, and especially the tribes of California. After Dr. Merriam’s death in 1942 his heirs, Mrs. Zenaida Merriam Talbot of Berkeley and Mrs. Henry D. Abbott of Washington, D.C., deposited their father’s collection of data in the Department of Anthropology at Berkeley. The transfer was made through the Smithsonian Institution, of which Dr. Merriam was a Research Associate, and which administered the E. H. Harriman Fund established for the purpose of supporting Dr. Merriam’s anthropological research.

Dr. Merriam published only a fraction of the information which he had secured. For a list of his publications which appeared during his life see C. Hart Merriam, Studies of California Indians. University of California Press, 1955 (reprinted 1962), pp. 227-229. Since 1950 when the Merriam Collection arrived in Berkeley additional material has been published under Merriam’s name. The following list specifies these:

Several other publications have utilized Merriam's photographs or ethnographic information. These include:

As of 1968 it appeared that the bulk of the information of broad and general interest had been extracted from the Collection, prepared for publication, and printed. At the same time, there still remain large bodies of data of great interest and value which have not been published. A thorough assessment of the kinds and quantity of information in the Collection seemed desirable at this point, and Dr. S. Dillon Ripley, Secretary of the Smithsonian Institution agreed and made funds available from the E. H. Harriman Fund for preparation of the present catalogue. The present catalogue, prepared during the summer of 1969 with the assistance of Miss Karen Nissen, Mr. Dennis Bailey and Mr. Marke Estis, is not intended to provide a detailed listing of the contents of the Merriam Collection, but rather a general guide to the kinds and amount of information in the file.

The Collection is now kept in a storage room in the basement of the Hearst Gymnasium in eight four-drawer filing cases. Inquiries concerning the Merriam Collection should be addressed to the author of this catalogue, Department of Anthropology, University of California, Berkeley, CA, 94720. None of the Merriam Collection materials will be duplicated by xerox or microfilm for reference by persons wishing to consult specific lots of data, but access to the Collection will be provided to qualified students by prior arrangement. Certain conditions (not specified here) attach to the publication of materials in the Merriam Collection.

Rationale of the Catalogue System

In 1966 there was published Heizer, Robert F. Languages, Territories and Names of California Indians. University of California Press, 1966 (vii, 1-62, 5 maps). A list and map of California tribal groups organized by linguistic stock as identified by Dr. Merriam. This classification has been used as the basis for the present catalogue, and the list is reproduced below for easy reference. Each linguistic stock has been assigned a letter of the alphabet in the order in which it appears in the list; thus, A is for Athabascan, B is for Polikla (Yurok), C is for Soolahteluk (Wiyot) and so on. Tribal groups are numbered in the appended list which is both a classification and a map key. The various categories of data in the Collection have been assigned a code reference as follows:

N: lists of names of bands, tribes or villages.
G: ethnogeography (information referring mainly to tribal boundaries)
E: ethnographic information (this does not include data already published and listed on pp. 1-2 above).
V: vocabularies (field recordings of Indian words written by Merriam in printed schedules).
BL: brief linguistic recordings (a not very extensive file of miscellaneous data, mainly recorded by Merriam).
NH: natural history word lists (field recordings of Indian words for plants and animals written by hand in printed schedules. Perhaps the most important single lot of unpublished Merriam data).
D: dictionaries (Indian-English or English-Indian).
CL:
comparative word lists (usually of languages within single stocks. These are taken from the V file and therefore represent Merriam's preliminary efforts at analyzing language and dialect variation within stocks).

The catalogue numbers take the following form:

Example 1.
A/1a/G2 (to be read: Athapascan stock/Tolowa tribe/Ethnogeography manuscript or notes No. 2).

Example 2.
U/20m/V84 (to be read: Midoo stock/Nisenan tribe/Vocabulary No. 84).

Some of the Collection has not been catalogued in detail but has simply been segregated and placed as individual lots in single filing drawers. These uncatalogued materials are in part of secondary interest and importance relative to information secured by Merriam himself from living Indian informants or are special in some respect. These lots of material are:

Nos. 1-4 have been revised and listed in greater detail in the revision. Nos. 5-11 are described in the Addendum, except no. 7 (maps) which were removed and cataloged separately. Newspaper clippings (no. 2) were discarded after microfilming.

1. Copies of historical documents (for further information see p. 84 of this catalogue).
2. Newspaper clippings (for topics see p. 85-86 of this catalogue).
3. Data on Indian welfare, abuses against Indians, Federal policies, legislation in behalf of Indians, Senate Hearings, etc. (for further information see pp.87-90 of this catalogue).
4. Miscellaneous data, nearly all of it secondary, arranged by topic (for listing see pp. 91-97 of this catalogue).
5. Typescript manuscripts of Merriam's publications. Includes items published by Merriam while he was alive and works published posthumously (for which see pp. 1-2 of this catalogue).
6. Filing case of 4" X 6" cards. Fourteen trays filed alphabetically of Indian village and tribal names. Mainly concerns California, but includes other areas of the far West (e.g. Nevada, Arizona, Baja, California). Contains about 16,000 cards.
7. Large lot of maps showing tribal and village locations prepared by Merriam. Includes the 1:1,000,000 base maps of California tribes from which the Merriam map was published in Heizer (1966) and accompanying "Boundary Description of California Indian Stocks and Tribes" by Zenaida Merriam Talbot (typewritten ms, 42 pp.) which has not been published. This miscellaneous file comprises a number of regional California maps and topographic sheets showing boundaries of one or more tribes; 60 U.S.G.S. topographic maps showing location of Indian villages in the Sacramento Valley.
8. File of about 150 4" X 6" cards "indexed by stock and tribe, of the Indian vocabularies obtained by C. Hart Merriam. Each card contains dates, stock and tribe name, names of informants, when known, and the number of copies of both vocabularies and field lists per tribe."
9. A "manuscript" (actually handwritten notes) on several hundred 3" X5" cards on California Indians. Accompanied by a typewritten "subject index". It appears that this was intended upon completion to be a general work on California Indians.
10. Partial manuscript with large number of illustrations on "Acorn Food."
11. Several versions of a manuscript "A Monache-Yokut Puzzle -A Noteworthy Case of Word Borrowing". Includes working notes, comparative word lists, lists of names of mammals. In effect this is an ethnozoological paper.

V. Vocabularies

Scope and Content Note
The Merriam vocabularies are either original field copies (or copies of these) written by hand in pen or pencil in printed vocabulary schedules. Information supplied here includes the group name, place where the record was made, date of recording and (usually) the informant's name. Some vocabularies are "composite" in that the same schedule was used to record words taken from two or more informants.

NH. Natural History Word Lists

Scope and Content Note

Indian words for plants and animals. Handwritten entries on printed schedules. These vary in completeness, some being very full and others containing only a few entries. This group constitutes an important archive of ethnozoology and ethnobotany. There are occasional entries noting what use a plant served, or some belief about a plant or animal, but in the main these are simply word lists.

                 Scope and Content Note
                 Miscellaneous collection mainly consisting of English translations of Spanish period mission documents in Bancroft Library concerning campaigns against Indians. All of these are mentioned and often abstracted by H. H. Bancroft in his History of California and a number of them have been recently published in full translation by S. F. Cook in U.C. Anthropological Records Vol. 16, No. 6, 1960, Vol. 20 No. 5, 1962. The documents are not individually catalogued but are divided by region as follows:

reel 74          Southern California
                 Northern California
                 Lower California
                 Utah

reel 74          In addition there has been filed with this group a series of copies of accounts of massacres of Indians by whites in California, Nevada and Oregon.

Microfilm: BANC FILM 1022 Originals: BANC MSS 80/18 c 69
Series 1: Indian Stocks and Tribes

Scope and Content Note
Contains handwritten notes, typescripts, index cards, clippings, and tribe lists.

Divided into two subseries. The first subseries, General Files, is arranged alphabetically by stock or tribe. This subseries consists of papers primarily on California Indians, with data on their customs, religion, language, and tribal structure. Also included are papers on tribal boundaries. Race relations between the various stocks and tribes and caucasians are documented primarily in news clippings.

The second subseries is Lists of Tribes, Bands, and Villages of California and Nevada Indians. The subseries name is Merriam's; however, information on a few tribes in Arizona and Baja, California is also included. Most of this material was systematically compiled by Merriam around 1917, and was probably intended as a reference file on California Indians. Stocks are listed alphabetically with tribes within each stock also listed alphabetically. The 19 file boxes contain a card index of Indian tribe and village names arranged alphabetically.

Series 2: Vocabulary Files

Scope and Content Note
Contains notes, tear sheets, notebooks, index cards, and clippings.

Divided into two subseries. Subseries 1, General Files, consists of Merriam's miscellaneous notes and secondary material extracted or copied from other sources. Included in this subseries are lists of the vocabularies collected by Merriam during his fieldwork, and a bibliography on index cards of works about or containing information on Indian vocabularies.

Subseries 2, Indian Stocks and Tribes, is arranged alphabetically. It consists of secondary material that was not indexed by Heizer in the original arrangement.

Series 3: Writings of Merriam on Indians, 1904-1974

Scope and Content Note
Contains manuscripts, typescripts, notes, publications, index cards, and clippings.

Includes manuscripts and typescripts of published and unpublished material and of posthumous publications edited by Robert Heizer. Divided into three subseries, each arranged alphabetically by title. Subseries 1, Manuscripts of Articles is arranged alphabetically by title.

Subseries 2, Manuscripts of Books, is arranged alphabetically by title, and then by chapter according to the order of the published work. Unidentified material is filed at the end of this subseries. Book reviews and clippings about individual works are filed with the work. Note that Archaeological Survey, Report No. 74, "Village Names in Twelve California Mission Records," was based on the research of Stella R. Clemence, one of Merriam's assistants and edited by Robert Heizer. Clemence's original research and notes are filed after the typescript of the work.

Subseries 3, Publications, is arranged alphabetically by title. These are reprints and offprints of various works by Merriam.
Series 4: Field Trip Notebooks, 1898, 1935-1938

Scope and Content Note
Contains notebooks.

Arranged chronologically. Recorded by his assistants and approved by Merriam, these notebooks detail trips taken late in his career in which Merriam continued to document the languages of Indian informants. The words and notes on pronunciation recorded in these notebooks were apparently never transferred to the printed schedules found in parts of the core collection. Note: some notebooks are recorded in shorthand.

Series 5: Indians in North, Central, and South America

Scope and Content Note
Contains miscellaneous notes, index cards, publications, reprints, and clippings.

Divided into four subseries. Subseries 1, Indians of North America, is arranged alphabetically by state and country. Subseries 2, Indians of Central America, is arranged alphabetically by region. Subseries 3, Indians of South America, is arranged alphabetically by country. Subseries 4, Other Indigenous People, is arranged from general to the specific, and then alphabetically by locality when applicable.

This series consists primarily of information about Indians in North America, especially in the United States. Subseries 1 includes a bibliography of various works on Indians in North America, with an emphasis on California Indians (reel 120). Subseries 2-4 consist mostly of clippings.
