Descriptive Summary

Collection Title: California State Earthquake Investigation Commission photographs from the Andrew C. Lawson collection,

Date (inclusive): 1900-1910,

Date (bulk): bulk 1906

Collection number: BANC PIC 1957.007

Extent: 60 boxes (ca. 645 negatives) and ca. 105 photographic prints698 digital objects

Repository: The Bancroft Library
Berkeley, California 94720-6000

Abstract: Photographs taken or collected by the California State Earthquake Investigation Commission to document the effects of the San Francisco earthquake of 1906 on the landscape and on buildings, roads and other structures. Locations range from Humboldt County in the north to San Bernardino and San Diego counties in the south.

Languages represented: Collection materials are in English.

Physical location: Many of the Bancroft Library collections are stored offsite and advance notice may be required for use. For current information on the location of these materials, please consult the library’s online catalog.

Access

RESTRICTED ORIGINAL glass plate negatives. Viewing prints available. Use of originals only by permission of the appropriate curator. Inquiries concerning these materials should be directed, in writing, to the Curator of Pictorial Collections, The Bancroft Library.

Please use digital facsimiles when possible.

Publication Rights

All requests to reproduce, publish, quote from, or otherwise use collection materials must be submitted in writing to the Head of Access Services, The Bancroft Library, University of California, Berkeley 94720-6000. Consent is given on behalf of
Finding Aid to the California State Earthquake Investigation Commission Photographs from the Andrew C. Lawson Collection, BANC PIC 1957.007, The Bancroft Library, University of California, Berkeley.

Restrictions also apply to digital representations of the original materials. Use of digital files is restricted to research and educational purposes.

Preferred Citation
[Identification of item], California State Earthquake Investigation Commission Photographs from the Andrew C. Lawson Collection, BANC PIC 1957.007, The Bancroft Library, University of California, Berkeley.

Alternate Forms Available
Digital reproductions of selected images are available.

Related Collections
Forms part of the Andrew C. Lawson photograph collection, transferred from the Andrew C. Lawson papers.

Acquisition Information
The California State Earthquake Investigation Commission Photographs from the Andrew C. Lawson Collection was given to The Bancroft Library by Mrs. Andrew C. Lawson on September 19, 1956.

Accruals
No additions are expected.

Processing History
Processed by Bancroft Library staff in 2005.

Arrangement
Many negatives bear plate number annotations which correspond to the plate numbers in the 1908 publication "The California earthquake of April 18, 1906: report of the State Earthquake Investigation Commission." These plate numbers, when legible, have been noted in the following Container List. Not all plates from the published report are present in this collection, and many negatives are present which were not published.

In this finding aid, the contents of the collection have been arranged into series according to photographer. As a result of this arrangement, images do not appear in item number order. Item numbers were originally assigned during various prior phases of collection processing and do not consistently reflect a natural grouping according to subject matter, location, or photographer or any other logical grouping. Because each of the photographers, for the most part, worked in a limited geographical range, the present arrangement is an attempt to reflect both the common sources as well as the content of the images.

The physical arrangement of the collection and the numbering scheme used to identify and locate items reflects three artificial series created by the library. This physical and numerical arrangement is not reflected in the organization of the present finding aid, except that item call numbers contain references to "series" numbers required for retrieval. Series 1 and Series 2 have no real difference in content. They both consist of original film and glass plate negatives. Images in Series 1 were grouped by photographers' names and assigned numbers by library staff. Series 2 includes many images that would logically fall within Series 1 and are from the same photographers and geographic areas, but the numbering for Series 1 had been established and it was impossible to neatly integrate them. Series 2 has been numbered according to early numbers found affixed to the negatives on round labels. Not all numbers in the range are present. These numbers seem to correspond with caption information in an album of J.C. Branner held at Stanford University. Series 3 is largely miscellaneous, containing photographic prints with no corresponding negative or negatives which were not included in Series 1 (usually by unknown photographers) and which did not have item numbers placing them in Series 2.

Scope and Content of Collection
The California State Earthquake Investigation Commission Photographs from the Andrew C. Lawson Collection consists of negatives and photographic prints taken by or collected by members of the Earthquake Investigation Commission. Images document the effects of the California earthquake of 1906 on the landscape and on buildings, roads and other structures. Locations range from Humboldt County in the north to San Bernardino and San Diego counties in the south. Most images focus on the geology of the event, documenting the results of earth movement, offset to fences and roads, landslides, etc. The series of images by Harold Wellman Fairbanks may date prior to the April 1906 earthquake, reflecting his research in Central and Southern California that lead to the identification of the San Andreas Fault. For example, Fairbanks is known to have visited the Carrizo Plain with A.C. Lawson in January, 1906. In addition to the geological landscape studies, the collection includes many views of structural damage in San Francisco, Santa Rosa, Tomales, Monterey, at Stanford University, and other locales.
The collection includes original glass plate negatives, later prints from some of these negatives (made by the library), glass plate copy negatives presumably made by the commission from photographic prints loaned to them, and original photographic prints made by others which were collected by Lawson or other commission members. Identified photographers include Andrew C. Lawson, Harry Oscar Wood, Harold Wellman Fairbanks, Francois Emile Matthes, Arthur Starr Eakle, Joseph N. LeConte, J.C. Branner, Grove Karl Gilbert, R.S. Holway, G.S. Crosby, and individuals only identified as Dudley, Moran, E.C. and R.A..

### BANC PIC 1957.007 Photographs from J.C. Branner 1906

**Creator/Collector:** Branner, John Casper, 1850-1922

**Physical Description:** 28 items

**Scope and Content Note**

Images submitted to the State Earthquake Investigation Commission by J.C. Branner of Stanford University. Presumably, they were photographed by him or under his direction. Most images are of Stanford University or elsewhere in or near Santa Clara or San Mateo counties.

BANC PIC 1957.007 Photographs from G.S. Crosby 1906

Creator/Collector: Crosby, G. S. (George S.)
Physical Description: 6 items
Scope and Content Note
Images by or from G.S. Crosby which were among the images of the State Earthquake Investigation Commission. Only prints are present, not negatives, and there is no evidence that these images were taken for the Commission or any of its members. They may have simply been collection by A.C. Lawson or another commission member out of general interest. All photographs are of damage to the Hotel Del Monte, in Monterey.

BANC PIC 1957.007 Photographs by Dudley 1906?
Physical Description: 52 items
Scope and Content Note
Images submitted to the State Earthquake Investigation Commission by a photographer identified only as "Dudley". It is likely that he assisted or was employed by one of the commission members. Views are chiefly from rural areas to the south of San Francisco, including Stanford University in Santa Clara County. Other locales are in Santa Cruz, San Mateo, and northern Monterey counties. Several views are from the Livermore area of Alameda County.

Photographs from Arthur Starr Eakle 1906

Creator/Collector: Eakle, Arthur S. (Arthur Starr)

Physical Description: 38 items

Scope and Content Note

Images submitted to the State Earthquake Investigation Commission by Arthur Starr Eakle. Presumably, they were photographed by him or under his direction. Included are views in Berkeley and Oakland, as well as images in Humboldt County to the north, where effects of the 1906 earthquake were observed.

Photographs from Harold Wellman Fairbanks 1906?

Physical Description: 79 items

Scope and Content Note
Images submitted to the State Earthquake Investigation Commission by Harold Wellman Fairbanks. Presumably, they were photographed by him or under his direction. Photographs document geological activity to the south of the San Francisco Bay Area, from Santa Cruz and Monterey counties to San Bernardino and San Diego counties. Some or all of these images may have been taken before the April 1906 earthquake, such as the views of the Carrizo Plain, which Fairbanks visited with A.C. Lawson in January of 1906. Fairbanks’ research contributed substantially to the identification of the San Andreas Fault and its extent.

Physical Description: 38 items

Scope and Content Note

Images submitted to the State Earthquake Investigation Commission by a photographer identified only as "Moran". It is likely that he assisted or was employed by one of the commission members. Views are chiefly of San Francisco and of Stanford University in Santa Clara County. Damaged streets, rail lines, water mains, as well as buildings are featured.

BANC PIC 1957.007 Photographs from Harry Oscar Wood 1906
Physical Description: 191 items
Scope and Content Note
Images submitted to the State Earthquake Investigation Commission by Harry Oscar Wood. Presumably, they were photographed by him or under his direction. Chiefly includes San Francisco views, with some of Berkeley, and others of land forms and earthquake effects in the landscape to the south of San Francisco. A few views are from the Shafter Ranch vicinity, in rural Marin County.

BANC PIC 1957.007 Miscellaneous 1906

Physical Description: 88 items
Scope and Content Note
The miscellaneous views included here have no identified photographer and it is not clear who submitted them to the State Earthquake Investigation Commission. They have been grouped together by the library as an organizational convenience, but they contain diverse subject matter. In addition to urban San Francisco views and images of damaged structures in various locales, they consist of landscape views documenting activity along the line of the San Andreas fault. Geographically, they range from Santa Rosa, in Sonoma County, south to Santa Barbara County.
