Collection Summary
Collection Title: Photographs of the San Francisco Earthquake and Fire from the Charles Derleth Papers.
Collection Number: BANC PIC 1958.021--fALB
Extent: 4 albums (ca. 825 photographic prints); albums are 32 x 26 cm. 557 digital objects
Berkeley, California 94720-6000
Languages Represented: English
Access
Collection is available for use.
Publication Rights
Copyright has not been assigned to The Bancroft Library. All requests for permission to publish photographs must be submitted in writing to the Curator of Pictorial Collections. Permission for publication is given on behalf of The Bancroft Library as the owner of the physical items and is not intended to include or imply permission of the copyright holder, which must also be obtained by the reader.
Copyright restrictions also apply to digital representations of the original materials. Use of digital files is restricted to research and educational purposes.
Preferred Citation
[Identification of item], *Photographs of the San Francisco Earthquake and Fire from the Charles Derleth Papers*, BANC PIC 1958.021--fALB, The Bancroft Library, University of California, Berkeley.

Digital Representations Available
Digital representations of selected original pictorial materials are available in the list of materials below. Digital image files were prepared from selected Library originals by the Library Photographic Service. Library originals were copied onto 35mm color transparency film; the film was scanned and transferred to Kodak Photo CD (by Custom Process); and the Photo CD files were color-corrected and saved in JFIF (JPEG) format for use as viewing files.

Identifier/Call Number: BANC MSS C-B 717,
and
Identifier/Call Number: BANC MSS 91/116 c

Acquisition Information
Transferred from the Charles Derleth papers (BANC MSS C-B 717). The papers were a gift of Paul Keim in 1957.

Biography
Charles Derleth, Jr. (1874-1956) received his B.S. degree at the City College of New York in 1894 and his degree in Civil Engineering at Columbia University in 1896. After serving as an instructor at Columbia and Professor of Civil Engineering at the University of Colorado, he became Associate Professor of Civil Engineering at the University of California, Berkeley in 1903. In 1907 he became Dean of the College of Civil Engineering. He held this position until 1942.

Derleth was the chief engineer for the Carquinez Bridge, and consulting engineer for both the Golden Gate Bridge and the San Francisco-Oakland Bay Bridge, as well as for the Posey Tube in Alameda, the Campanile on the Berkeley campus, and the San Francisco Civic Auditorium. Derleth was also the Director of the Testing Laboratory in the Civil Engineering Department at UC Berkeley, and a member of the Technical Society of the Pacific Coast.

Scope and Content
The collection consists of four albums of views collected by Charles Derleth of fires and ruins immediately following the 1906 San Francisco earthquake. The albums have been divided by Derleth into 28 subject groupings that include seismographic records, geological views (before and after the earthquake), and views of various types of structures and the effects of the earthquake upon them. The focus of the collection is upon structural damage to buildings and the infrastructure of the city, such as water supply pipelines. Also included are photographs of sites in the greater San Francisco Bay Area, including Stanford University, Santa Rosa, Point Reyes and Berkeley. Volume one also includes a small section of copy photographs from the earthquake of 1868.

Many of the photographs have handwritten captions, presumably by Derleth. Some of the photographs were taken by Derleth. Other photographers' work featured in the albums include T. E. Hecht, A. Blumberg, R. J. Waters & Co., C. P. Magagnos, the Pillsbury Picture Co., A. L. Murat, and Stewart and Rogers.

9 Humboldt Bank Sept. 22/06 [September 22, 1906]
Near Gorman Sta., [station] probably 1857 earthquake

E. side Carissa Plains, old fault scarp

Mohave Desert, near Big Rock Creek, fault and cliff

Cracks in hills at Shelter Cove, Humboldt Co. [county]

One mile S. of Chittenden; lake made by a fall that washed out of valley of old fault

Fault scarp near Swartouit, 10 mi. [miles] E. Big Rock Canyon, San Antonio

Fremont Bldg. for Claus Spreckels; S. W. corner Fremont and Market Sts., Jan. [January] 15, 1908. Pete driving - bluish mud at top; begins to drive hard the last 6 ft. 40 ft. lengths - 12" drain, butt, 8" diam. top - Brought up solidly at 40 ft. depth, probably on hard pan. Designed for 20 tons per pile. Piles at Market St. between Spear and Stuart [Steuart]. 40 ft. Long, were loaded to 50 tons without appreciable settlement by test load.

No. 1 Fremont Street, east side, beginning 137 ft. south of Market; walls settled and basement floor forced up during earthquake. As here shown, walls have been removed above concrete work, leaving earthquake effects exposed. We are driving piles in lot next, northward, and find they drive very easily to depth of 38 to 42 ft. +, thus showing the softness of foundation. W. L. Huber, Jan. 23, 1908.

San Francisco Earthquake and Fire, 1906. Fremont St., South of Market St. Basement floor on soft material
