Descriptive Summary

Title: Aquatic and Wildlife Management Records

Collection Number: SEKI 22568

Creator/Collector: Sequoia and Kings Canyon National Parks

Extent: 33.25 linear feet

Repository: Sequoia and Kings Canyon National Parks
Three Rivers, California 93271

Abstract: Records generated by the branch of Aquatic and Wildlife Management within Sequoia Kings Canyon National Parks.

Language of Material: English

Access

Collection is open for research by appointment.

Publication Rights

Many collections are former federal government records and are in the public domain. Other collections are from private sources; copyright has been transferred to the NPS on most. Some collections have publication restrictions. Researchers are required to properly credit all materials used. The researcher assumes responsibility for acquiring copyright permissions when needed.

Preferred Citation

Aquatic and Wildlife Management Records. Sequoia and Kings Canyon National Parks

Biography/Administrative History

The Division of Natural Resources Management in Sequoia and Kings Canyon National Parks was created in 1976, and was the final division to be separated from the original Ranger function. One primary focus of the records concerns the interactions between bears and visitors. Additional records document the parks’ attempt to understand wildlife populations, particularly the status and movements of deer populations, monitoring the remaining bands of Sierra Big Horn Sheep, and data on other species such as marmots, peregrine falcons, and spotted owls. Aquatic Management records document the health of aquatic ecosystems, including impacts of acid rain deposition and introduced fish populations. The branch added an aquatic biologist in 2005 to manage the recovery of local amphibian species, particularly the Mountain Yellow-Legged Frog. Additional aquatic records include surveys of Western Pond Turtle populations.

Scope and Content of Collection

This collection consists of scientific field data, field notes, plans, reports, articles, correspondence, reference material, research, maps, resources, aerial photographs, personal notes, meeting notes, data logs, manuals, protocols, surveys, regulations, development impact studies, publications, environmental assessments, statements, comments, contract modifications, contract renewals, permits, strategy, and budget and staffing records relating to Wildlife Management in Sequoia and Kings Canyon National Parks. Specific topics include Aquatic and Terrestrial Resources, Fire Management and Impact, and Compliance records. This collection is organized into five series: Aquatic Resources, Terrestrial Resources, Fire Management and Impact, Administrative Files, and Park Wide Project Review.
