Preferred Citation

Charts documenting incidence of a number of diseases in Berkeley, Calif., b5/19y the Health Department. Berkeley Historical Society

Acquisition Information

Gift of Mark Numainville, August 2013.

Scope and Content of Collection

Charts listing various diseases with number of cases reported indicated by pinholes in the charts. The charts are undated and presumably represent annual statistics, but the high incidence of influenza on one of them suggests the date of the epidemic, 1918, for one of them. Other common diseases with high incidence are measles and mumps, but a large number of diseases are recorded.
