The Don B. Huntley College of Agriculture is one of nine colleges at California State Polytechnic University, Pomona. It is the oldest program at Cal Poly Pomona and considered the university's founding college. The collection contains printed materials, photographs, and audiovisual materials that document the history, operations, faculty, students, staff, and buildings of the college.

Conditions Governing Access
Advance notice required for access.

Conditions Governing Use
Unpublished manuscripts are protected by copyright. Permission to publish, quote, or reproduce must be secured from the repository and the copyright holder.

Preferred Citation
[Box/folder# or item name], California State Polytechnic University, Pomona Don B. Huntley College of Agriculture Records, Collection no. 0017, University Archives, Special Collections and Archives, University Library, California State Polytechnic University, Pomona.

Immediate Source of Acquisition
The materials in the collection were gathered from University Archives files.

Biographical / Historical
The Don B. Huntley College of Agriculture is one of nine colleges at California State Polytechnic University, Pomona. It is the oldest program at Cal Poly Pomona and considered the university's founding college.

The campus that would eventually become Cal Poly Pomona was established in 1938. That year, the former Voorhis School for Boys in San Dimas, California was donated to the state by its founder automotive executive Charles B. Voorhis. Voorhis wished that the property be used for educational purposes and the state decided to operate it as the southern satellite branch of the California Polytechnic School in San Luis Obispo (today known as the California Polytechnic State University, San Luis Obispo.) The new campus became known as the Voorhis Unit and when it opened its doors in September 1938 it offered only three courses of study, all of which were agricultural: Citrus Production, Ornamental Horticulture, and Agricultural Inspection.

The Voorhis Unit closed from 1943-1946 because most of the all-male student body had been drafted to serve in World War II. When the campus reopened in September 1946, the three original majors remained, though Agricultural Inspection had been renamed Services and Inspection. The campus added three more agriculture majors soon after the war: Crops Production, Soil Science, and Agricultural Engineering.

As the Agriculture program continued to grow, the California State University system received another generous gift in 1949 when cereal magnate W.K. Kellogg donated his 813-acre Arabian horse ranch located in Pomona, California. Like Voorhis, Kellogg stipulated that the land be used for educational purposes, but also that the Arabian horse breeding program continue. The new campus was turned over to the California State Polytechnic Colleges and the two southern campuses became known as the Kellogg-Voorhis Unit. With the addition of a working ranch, the school was able to offer a major in Animal Husbandry.

The student body soon outgrew the smaller Voorhis campus and all instruction was moved to the Kellogg Campus in fall 1956. In 1959, the Agriculture Division began offering degrees in Agricultural Business Management and Landscape Architecture. The department of Foods and Nutrition was launched in 1965, and in 1966, the Division was renamed the School of Agriculture. Two years later, the school reorganized its various areas of study into three distinct departments: Plant and Soil Science (offering degrees in Agronomy, Fruit Industries, Soil Science, and Agricultural Biology); Ornamental Horticulture (offering degrees in Horticulture and Park administration); and Agricultural Engineering (later renamed Landscape Irrigation Science).

In 1970, longtime dean Carl Englund resigned. At the time, there were 1155 students and eight majors in the School of Agriculture: Agricultural Business Management, Animal Science, Foods and Nutrition, International Agriculture, Landscape Architecture, Park Administration, Soil Science and Urban Planning. Within a year, Landscape Architecture and Urban
Planning were moved to the newly created School of Environmental Design; the departments of Agricultural Biology, Agronomy, Fruit Production, and Soil Science were combined into a single department of Plant and Soil Science; and a new credential program in vocational agriculture to train secondary teachers in urban agriculture was introduced. This was a fifth-year program designed to meet what was then a shortage of agriculture teachers.

In addition to the reorganization, a new degree in Home Economics was introduced by the Department of Foods and Nutrition in 1971. A clothing laboratory to support the Home Economics curriculum was installed and by 1975 the department had been renamed Foods & Nutrition/Home Economics. Twenty years later, the Home Economics program was phased out and the classes spun off into the new department of Apparel Merchandising and Management. The Foods & Nutrition Department was renamed Human Nutrition and Food Science in 2001 and in 2015 the department celebrated its 50th anniversary.

The first building constructed for the agriculture program was the Agricultural Engineering building (Building 45), which opened in 1960. The Agriculture building (Building 2) was completed in 1963. The Agricultural Classroom building (Building 7) was completed in 1970 and would later become the Environmental Design building.

In 1987, Cal Poly Pomona was granted permission by the California State University Chancellor’s Office to rename its various schools "colleges" and the School of Agriculture became known as the College of Agriculture. The College was renamed in 2016 in honor of alumnus and benefactor Don B. Huntley. Huntley, who graduated in 1960 with a degree in animal husbandry, is a successful farmer, businessman, and philanthropist who pledged his $16.4 million pistachio farm to the college. Huntley also supported the creation of the 14-acre Huntley Vineyard on the Cal Poly Pomona campus, from which the college harvests grapes to make Horsehill Vineyards wine. Another notable gift came from actor Raymond Burr, who donated his orchid collection to the college in the 1980s.

As of 2019, the College of Agriculture has five departments: Agribusiness & Food Industry Management/Agricultural Science, Animal & Veterinary Sciences, Apparel Merchandising and Management, Nutrition and Food Science, and Plant Science. In addition, there are seven centers: Agricultural Research Institute, AGRIscape, the Apparel Technology and Research Center (ATRC), the Center for Antimicrobial Research and Food Safety (CARFS), the Center for Turf, Irrigation and Landscape Technology (CTILT), the Farm Store at Kellogg Ranch, and the W.K. Kellogg Arabian Horse Center.

**Scope and Contents**

The collection containes printed materials, photographs, and audiovisual materials that document the history, operations, faculty, students, staff, and buildings of the Don B. Huntley College of Agriculture at California State Polytechnic University, Pomona.

**Arrangement**

The collection is arranged into the following series: Series 1: Printed Materials; Series 2: Photographs; and Series 3: Audiovisual Materials.

**Related Materials**

W.K. Kellogg Arabian Horse Center Records, Collection no. 0062, W.K. Kellogg Arabian Horse Library, Special Collections and Archives, University Library, California State Polytechnic University, Pomona.

**Processing Information**

The collection was processed by Alexis Adkins and Evelyn Valenzuela in 2019.

**Subjects and Indexing Terms**

California State Polytechnic University Pomona University - Don B. Huntley College of Agriculture

Scope and Contents
The series includes brochures, flyers, press releases, and clippings that document the Don B. Huntley College of Agriculture's educational programs, public events, and faculty, students, staff, and alumni. Materials related to faculty include clippings of articles in which they are quoted, news releases announcing awards and appointments they have received, and obituaries.

Arrangement
The series is arranged alphabetically by folder title.

box 1 Ag Career Day 2007 April 26
box 1 Agribusiness circa 1980
box 1 Agricultural Biology circa 1975-2002
box 1 Agricultural Business Management circa 1980
box 1 Agricultural Education 1955-2000
box 1 Agricultural Education Field Day 1969-1980
box 1 Agricultural Engineering circa 1965
box 1 Agriculture, Nutrition and International Development Option 2003
box 1 AGRlscapes circa 1995-2001
