Preface and Guide to Inventory
The records of the Public Utilities Commission and its predecessor, the California Railroad Commission, described in this inventory contain a large amount of information on the facilities and operations of railroad companies, gas and electric companies, water companies, and telephone and telegraph companies in California. The collection thus bears significantly upon the social and economic history of the state.

Arranged according to the organization of the Public Utilities Commission in 1953, the inventory includes descriptive detail on the following divisions: Administrative, Utilities, Transportation, Finance and Accounts, and the Southern District. Series descriptions include entry number, title, volume in number of folders (f) and/or volumes (vols.), date span, file number, location data, detail on physical types, and notes on subject content.

A substantial portion of the described material consists of selected FORMAL COMPLAINTS and FORMAL APPLICATIONS acted on by the commission between 1908 and 1932. Complaint and application files relate to particular companies. They contain correspondence, memoranda, reports, legal documents, statistical data, transcripts of hearings, exhibits, and engineers'
valuations which often provide in-depth documentation of various aspects of company operations. An alphabetical name index of railroad companies and other utilities which lists all series or subseries containing information on a particular company is provided on pages 264 through 288.

The inventory itemizes a large number of maps, blueprints, drawings, and photographs, which are a part of the files described. The detailed worksheets developed by the Archives in the course of processing this material have been collected in three binders, labeled Public Utilities Map Book, which are available for reference and research use in the Search Room of the State Archives. Citation of the P.U.C. Map Book in the inventory refers to this Search Room finding aid. Series 21 of the inventory deserves special note. In 1912 the Commission required all steam, electric, street, and switching railroads in California to submit a complete set of maps of the location of their lines and facilities. Series 21 lists the ninety-five railroad companies that submitted some 5,000 maps in responding to the order. These maps contain a vast amount of detailed and precise information on rights of way, plats of stations, depots, yards, and other facilities, ownership of land and location of structures adjacent to railroad lines, and nearby geographic features. The Archives has a card index listing these maps by railroad and/or geographical location, with separate indexes for (1) alignments, (2) profiles, and (3) station plats. The card index is further divided between the facilities of the Southern Pacific Company and all other railroads operating in California in 1912.

Agency History
The duties of the Public Utilities Commission (hereafter P.U.C.) involve the regulation of the intrastate activities of railroads and other transportation companies, including inter-urban and street railways, steamship companies, canals, toll bridges, pipelines, and freight by stages and trucks, and includes the regulation of warehouses and of public utilities engaged in the selling of water for domestic and irrigation purposes, gas, electric power, steam heat, telephone and telegraphic services. It is primarily charged with (1) fixing rates and granting reparation for excess charges: (2) supervising service conditions; (3) controlling financing of public utilities: and (4) regulating their competition with one another.

The first attempt by the state government to regulate public utilities came with the establishment of a Transportation Commission in 1876, composed of three commissioners with limited jurisdiction over steam railways (Stats. 1875-76, Chap. 515). The next year the Commission was abolished and replaced by a single Commissioner of Transportation, empowered to examine complaints against steam railways and report to the governor (Stats. 1877-78, Chap. 641). In 1879, under section 22 of Article XII of the State's newly passed constitution, the California Railroad Commission (hereafter C.R.C.) was created to replace the Transportation Commissioner. This Commission inherited all the authority of its predecessor, as well as authority to review long and short haul practices, increases and reductions in rates, and discriminations in charges. The next year its authority was expanded to include all railroads other than street railways, and steamboats in intrastate transportation (Stats. 1880, Chap. 59).

In 1909, the Wright Act (Stats. 1909, Chap. 312), endowed the Commission with the power to fix maximum rates. The modern authority and responsibilities of the Commission were the result of the Railroad Commission Act (Stats. 1911, Chap. 20), the Public Utilities Act (Stats. 1911, 1st Ex. Sess., Chap. 14) and Assembly Amendments of 1911, Nos. 6, 47, and 50 (amendments adopted by special election on October 10, 1911).

In 1911, the newly reformed C.R.C. created four departments to facilitate its operations (Legal, Rates, Statistics and Accounts, and Engineering). The Rates and Engineering Departments in turn established divisions to deal with particular functions (see Chart I at end of agency history). In 1917, the C.R.C. was given authority over auto stages and trucks (Stats. 1917, Chap. 213) and a new department was established to handle this function. In 1935, the Commission's authority was further expanded to cover highway and city carriers (Stats. 1935, Chap. 223 and Chap. 312).

The basic structure of the C.R.C. remained unchanged until 1937 when the Commission reorganized itself. The Rates and the Engineering Departments were eliminated and the divisions which had composed them were divided between the newly created Utilities and Transportation Departments (see Chart II at end of agency history). The organization of the Commission has remained unchanged essentially from 1937 to the present. In 1946, by amendment of section 22 of Article XII of the State Constitution, the name was changed to the Public Utilities Commission. By a 1953 administrative action, its departments were re-named divisions and its divisions were re-titled branches.

Folder F3725:2-4.

1. ORGANIZATIONAL INFORMATION. 1921, 1923, 1949-1957.
   Physical Description: 1ff.
   Scope and Content Note
   Organizational charts placed first, other materials placed thereafter in chronological order
   thereunder.
   Contains organizational charts of the P.U.C. and certain of its divisions, narrative reports
   on the operation of certain divisions, and lists of employee positions. Of special interest is
   a copy of the Commission's instructions to its employees, dated 1957.
   Filed separately are two oversized organizational charts of the C.R.C. from 1921 and
   1923. See F3725:3-4.
   In the Selective Archives Record Group is a chart listing the terms of Commissioners from
   1911 to 1948 (F566-1), and a chart of Governor's appointments to the Commission from
   1911 to 1963 (F3511).

Folder F3725:5-12.

   Physical Description: 8ff.
   Scope and Content Note
   Arranged chronologically by year and by source or destination thereunder.
   Heavily sampled series. Contains 1958 correspondence to the Legislature describing the
   operation and expenses of the Commission; letters from the President of the Commission
to other Commissioners expressing his opinions on decisions and, in some cases, their
replies; and memoranda between the Secretary and P.U.C. divisions conveying
information on pending cases and application proceedings.

Physical Description: 31ff.
Scope and Content Note
Subject file number key explaining P.U.C. filing system placed first in file; correspondence arranged chronologically by year and by Commission subject file number code thereunder.

Heavily sampled series. Contains questions from attorneys and companies about the legal status of out-of-state companies; informal complaints from the public about services and rates of railroad, gas, and telephone companies, and copies of Commission replies; sampling of monthly reports submitted by telephone companies providing statistical data on the usage of their systems and on the speed with which service was delivered; communications from common carriers requesting information on filing procedures for permits and copies of Commission replies; letters from other states' public utilities commissions requesting information on utilities regulation practices in California; requests by trucking firms to be allowed to issue stocks and bonds; requests for information from the Governor and the public involving Interstate Commerce Commission decisions and replies by the P.U.C. - including in some cases copies of applications and exhibits submitted to the I.C.C.; and miscellaneous correspondence involving the regulation of water transport companies, electric power companies, auto-van and storage companies, and the valuation of utilities. In each case, a copy of the Commission's reply is attached to the letter received by the Commission.

3a. SUBJECT FILES - TRACKAGE AGREEMENTS. 1912-1941.

Physical Description: 3ff.
Scope and Content Note
Correspondence from 1912 to 1929 placed first (in alphabetical order by name of company), materials from 1930-1941 placed thereafter in reverse chronological order.
Under section 51(a) of the Public Utilities Code all trackage agreements between railroads (for the joint use or rental of portions of track) must be submitted to the Commission for approval.
Contains cover letters and copies of trackage agreements; copies of Commission responses explaining whether or not agreements were acceptable; letters from United States Railroad Administration describing World War I railroad agreements in California sponsored by the Administration; communications from freight shippers, the State Department of Finance, and railroad workers unions requesting information on the nature of trackage agreements; and replies by Commission providing the information requested.

Physical Description: 2ff.
Scope and Content Note
Arranged chronologically.
Narrative reports to the Legislature justifying P.U.C. proposed budgets. Each describes in detail the functions and organization of the various divisions of the Commission. Also included are detailed breakdowns of the budgets which contain a great deal of information on the size of the staff of each division and the percentage of time each staff member spends performing various functions (information summarized in charts).
5. FORMAL COMPLAINTS. 1908-1932.

Physical Description: 57cf.

Scope and Content Note

Selected cases arranged by case number in ascending order. Documents composing cases placed in the following categories in the following order: Commission reports, legal documents, Commissioner's notes, memoranda, evidence collected by C.R.C., correspondence, transcripts, exhibits, and C.R.C. Engineer's valuation reports. Arranged in reverse chronological order thereunder, unless otherwise stated below.

Formal complaints could be brought by the Commission's own motion on behalf of the people of California, or upon complaint of a third party, but having for its object the rendition of an order or decision which could be enforced by the Commission. Formal complaint hearings were governed by the standard rules of courtroom procedure.

Each case is described briefly in a paragraph statement in the biennial reports (Journal of the Senate and Assembly [1908] Appendix Vol. 4, pp. 48-72, [1910] Appendix Vol. 5, pp. 73-94) and the annual reports of the Railroad Commission (Reports of the California Railroad Commission, 35 Vols.), for the year in which the formal complaint was filed. Includes a statement of the nature of the case and its current status at the time the report was printed. Cases listed by case number in ascending order. The Commission published every few months its opinions and orders (The Opinions and Orders of the Railroad Commission of California, 42 Vols.). Opinions and orders comprise a description of the decision reached and a discussion of the testimony and evidence which led the Commission to come to its conclusions. Arranged chronologically in volumes by date on which the decision was reached. Both the Reports and the Opinions and Orders are fully indexed in each volume, both by the name of the individual company involved and by the case number.

Materials arranged in the following categories:

Reports

Scope and Content Note

Originals or copies of opinions (statement of the Commission's position on the issues raised by a case which was a precedent to be applied to similar cases in the future), orders (requirements carrying the force of law for a utility company to upgrade services, reduce rates, and/or repay consumers for past overcharges), and dismissals (a brief paragraph explaining the reasons why a case was dismissed). Identical to reports published in bound volumes of opinions and orders mentioned above, with the exception that the unpublished reports contain the names or signatures of those Commission members who were responsible for the decision.

Legal Documents

Scope and Content Note

Contains certain of the following: formal complaints by plaintiff(s) stating the nature of the alleged violation of the Civil Code or Commission rulings; defendant's answer--reply to the formal complaint arguing the legality of the defendant(s) actions; notice of motion to dismiss--giving detailed legal arguments by defendant(s) for a dismissal; demurrers (plea for dismissal) from defendant(s) or defendant(s) council stating legal grounds for dismissal of case; and consent forms from plaintiff(s) stating that a case could be dropped. Defendant's answers occasionally include copies of articles of incorporation, agreements, contracts, mortgages, and local ordinances bearing on the case.
Commissioner's Notes
Scope and Content Note
Handwritten notes summarizing the most important testimony and evidence presented in a particular case. Probably used in the preparation of opinions, they are suggestive of what testimony and evidence most strongly led the Commission to reach its final decision. These notes exist only in a few cases. They have been preserved only when they are legible and sufficiently detailed to be of significant research value.

Memoranda
Scope and Content Note
Copies of correspondence sent between Commission members expressing opinions on the nature of a case, and correspondence and reports from C.R.C. departments explaining the nature and history of a given case, providing technical information, and offering suggestions as to the decision the Commissioners should reach. Reports emanate most frequently from the Engineering Department (dealing usually with the condition of equipment, quality of service provided, and safety factors), the Rates Department (involving the operating expenses of a utility and the legitimacy of rates charged or proposed rates), the Auditor's Department (auditing company books), and the Stocks and Bonds Department (reporting on the financial state of a utility and the advisability of allowing further stock and/or bond sales).

Evidence Collected by C.R.C.
Scope and Content Note
Statistical data and narrative reports from C.R.C. departments, and data requested from the defendant(s), complaintant(s), and other utilities involved in similar operations as those of the defendant(s). Includes data on the income and expenses of various utilities, confidential lists of stockholders, and narrative descriptions of services provided. Similar to the type of information available in the exhibits, with the exception that this evidence was not assigned exhibit numbers and was not made public. It was for the confidential use of the Commission in reaching its decisions.

Correspondence
Scope and Content Note
Contains certain of the following: requests from persons or organizations not directly involved in a case asking for information on the case, or clarification about the nature of the Commission's decision (often letters received many years after a case was decided); copies of the C.R.C. secretary's replies; letters from plaintiff(s), defendant(s), or their lawyers requesting clarification of the legal nature of the case; copies of replies by the Commission's secretary or Commission members; complaints from the public about services provided by the defendant(s) or about rates charged; petitions either favorable or unfavorable to the defendant(s); copies of Commission requests for technical information from the defendant(s), complaintant(s), and/or utilities involved in similar operations to those of the defendant(s); replies providing the information requested; and descriptions by the defendant(s) after a decision was rendered of what actions were being taken to comply with the Commission's order(s).

In some cases includes correspondence involving informal complaints which were later incorporated into a formal complaint case. This correspondence usually comprises a copy of a statement by the Commission explaining the nature of the case, letters from the public complaining about utility services and/or rates; requests by the Commission for the utility(ies) involved to reply to the complaint(s) and if possible to reach a mutually acceptable agreement with the complaintant(s); and statements by utility(ies) to the Commission explaining their position on the complaint(s) and describing what action, if any, they intend to take.
Transcripts

Scope and Content Note
Includes testimony by witnesses and councils' statements. Comprises testimony of plaintiff(s) as to how they had been treated in violation of the law or C.R.C. rulings, of utility users other than the complaintant(s) describing typical services provided and rates charged, of utility officials explaining the legality of their rates and the adequacy of their services, and by technical experts (such as engineers and auditors) about the nature of services provided and the cost of providing such services.

Statements by Council for the plaintiff and defendant are in some cases placed in a separate volume and in some cases bound with the witnesses' testimony. They contain a deliniation of the legal positions of the complaintant(s) and defendant(s), giving statuatory references. Concluding summaries by council of the evidence and testimony provided are also included.

Exhibits

Scope and Content Note
Documents numbered by C.R.C., presented by complaintant(s), defendant(s), intervenors, and the Commission itself in support of their various positions. Composed largely of statistical data including charts of rates charged for services, distances between various points goods were transported, rates charged by other utilities (including utilities in other states) for similar services; income and expenses of utility companies; deeds, agreements, contracts, and ordinances bearing on the case, cost of construction and maintenance of utilities as well as reproduction costs; maps of railroad lines; drawings of equipment; and blueprints of dams, buildings (such as railroad stations), and bridges; as well as photographs of equipment in use and of the construction of dams and railroad lines. (Note: large maps, drawings, diagrams, charts, and blueprints, as well as photographs have been filed separately. For a more detailed description of these items and references to their locations, see P.U.C. Map Book.)

Between 1917 and 1920 the exhibit room staff of the C.R.C. composed lists of the exhibits in each case (including a brief description of each exhibit and its date of submission). Where these lists still exist they have been filed in the first folder of exhibits in a particular case to act as a table of contents. The exhibits are arranged in the order they appear in the exhibit list (note: not all exhibits listed still exist).

C.R.C. Engineer's Valuation

Scope and Content Note
Report on the value of all the physical property of a utility, prepared by the Engineering Department. These reports usually include a map of the utility system, a description of the means by which values were set, a brief corporate history, a summary of the findings, and an extremely detailed valuation of all the physical property of a utility (including in the case of railroads the cost of railroad ties and spikes). These reports were the result not only of an investigation of company books, but also of on site investigations involving, in the case of railroads, travelling along every inch of the line noting all physical property. These valuations are especially useful in research into the nature and extent of the operations of the state's railroads.

In 1912, the Commission on its own initiative ordered all the state's railroads valued as of that year (see cases 129-213).

In certain complaint cases, C.R.C. Engineer's valuations were numbered as exhibits and are therefore located with the exhibits rather that filed separately. Such cases are duly noted below.

Note: transcripts and, less frequently, exhibits often relate to more than one case. When this occurs the material is filed with the case with which it was originally filed by the Commission. Other cases, or applications, to which material relates are listed immediately after the title of the case with which the material is filed. Such instances are cross indexed.

6. FORMAL APPLICATIONS. 1912-1928.

Folder F3725:1439-2694.

Physical Description: 37cf.

Scope and Content Note
Selected applications arranged by application number in ascending order. Documents from application proceedings placed in the following categories in the following order: Commission reports, legal documents, Commissioner's notes, memoranda, evidence collected by the C.R.C., correspondence, transcripts, exhibits, and C.R.C. valuation reports. Arranged in reverse chronological order thereunder, unless otherwise stated below.

A formal application is a request for some right by a utility or by a person or corporation seeking to become a utility, such as an application for a certificate of public convenience and necessity, an application to increase rates, an application to build tracks across the right of way of a road or railroad, or an application to issue bonds or sell stock. Unlike formal complaint cases, there is no complainant or defendant; yet, an applicant may be opposed by a protestant(s) whose interests conflict with those of the applicant's. A third party, called an intervenor, may become involved--either in support or opposition to the applicant.

Each application is described briefly in a paragraph statement in the annual reports of the Railroad Commission, which includes a statement of the nature of the application and its current status at the time the report was printed. The Commission published every few months its opinions and orders in bound volumes. Opinions and orders comprise a description of the decision reached and a discussion of the testimony and evidence which led the Commission to come to its conclusions. For full references to these sources see series entry 5, FORMAL COMPLAINTS, 1908-1932.

A register for formal applications filed between 1912 and 1917 is available in the Selective Archives Record Group (F3566-5). Volume arranged by application number in ascending order. Lists application number, date application was submitted, name of utility making application, brief statement of the nature of the application, date when hearing was scheduled, and the date on which a decision was reached.

Materials arranged in the following categories:

Reports
Scope and Content Note
Originals or copies of opinions (statement of Commission's decision), orders (requirement carrying the force of law for a utility company to upgrade services, reduce rates, and/or repay consumers for past overcharges), and dismissals (a brief declaration stating that an application had been withdrawn. Identical to reports published in bound volumes of opinions and orders mentioned above, with the exception that the unpublished reports contain the names or signatures of those Commission members who were responsible for the decision.

Legal Documents
Scope and Content Note
Contains certain of the following: applications to change rates, to issue stocks and/or bonds, to purchase a utility, for a certificate of public convenience and necessity, or to construct tracks over the right of way of a road or railroad (note: often exhibits required by the Commission to be included with an application were attached to the application itself and are therefore filed with the legal documents - these can include the following: articles of incorporation, maps of crossings, agreements, deeds, and descriptions of proposed stock and/or bond issuances - such instances are duly noted below). Also contained in this category are objections from the public, municipalities, or other businesses to the proposed application; replies from the applicant to objections; and petitions from the applicant to formally drop the application.
Commissioner's Notes
Scope and Content Note
Handwritten notes summarizing the most important testimony and evidence presented in a particular application proceeding. Probably used in the preparation of opinions, they are suggestive of what testimony and evidence most strongly led the Commission to reach its final decision. These notes exist only for a few applications. They have been preserved only when they are legible and sufficiently detailed to be of significant research value.

Memoranda
Scope and Content Note
Copies of correspondence sent between Commission members expressing opinions on the nature of an application, and correspondence and reports from C.R.C. departments explaining the nature and history of a given application, providing technical information, and offering suggestions as to the decision the Commissioners should reach. Reports emamate most frequently from the Engineering Department (dealing usually with the condition of equipment, quality of service provided, and safety factors), the Rates Department (involving the operating expenses of a utility and the legitimacy of rates charged or proposed rates), the Auditor's Department (auditing company books), and the Stocks and Bonds Department (reporting on the financial state of a utility and the advisability of allowing further stock and/or bond sales).

Evidence Collected by C.R.C.
Scope and Content Note
Statistical data and narrative reports from C.R.C. departments, and data requested from the applicant(s), protestant(s), and other utilities involved in similar operations to those of the applicant(s). Includes data on the income and expenses of various utilities, confidential lists of stockholders, and narrative descriptions of services provided. Similar to the type of information available in the exhibits, with the exception that this evidence was not assigned exhibit numbers and was not made public. It was for the confidential use of the Commission in reaching its decision.

Correspondence
Scope and Content Note
Contains certain of the following: requests from persons or organizations not directly involved in an application proceeding asking for information on the application, or clarification about the nature of the Commission's decision (often letters received many years after a decision was handed down; copies of C.R.C. Secretary's replies; letters from applicant(s) and/or protestant(s) requesting clarification of the legal nature of the formal application proceedings; copies of replies by the Commission Secretary or Commission members; letters from the public either opposing or supporting an application and often expressing complaints about utility services and rates; petitions either favorable or unfavorable to the application; copies of Commission requests for technical information from the applicant(s), protestant(s), and/or utilities involved in similar operations to those of the applicant(s); and replies providing the information requested.

Transcripts
Scope and Content Note
Includes testimony of witnesses and council's statements. Comprises testimony by applicant(s) as to the justification for a change in tariff rates, the necessity of stocks and/or bond issuances, or the need for the construction of a crossing; of protestant(s) expressing reasons for opposing the application; and of technical experts (such as engineers and auditors) about the nature and cost of services provided, the financial condition of the utility, and the safety of proposed crossing(s).
Exhibits

Scope and Content Note
Documents numbered by C.R.C., presented by applicant(s), protestant(s), intervenor(s), and the Commission in support of their various positions. In rate applications usually comprises statistical data including charts of existing and proposed rates, distances between which goods are transported, the rates of similar utilities providing similar services, and income and expenses of utilities, the cost of construction and maintenance, valuations, deeds, agreements, contracts, and local ordinances dealing with utilities. Application to purchase utilities and/or to issue stocks and/or bonds frequently include valuations, data on projected income and expenses, mortgages (existing and proposed), lists of stockholders, data on proposed financing of purchase or of issuance of stocks and/or bonds, deeds, agreements, contracts, and local ordinances. Applications for crossing(s) usually contain maps, profiles, and diagrams of proposed crossing(s) and diagrams or plans of proposed signalling devices. All applications may contain maps and profiles of railroad lines, water canals, transmission lines, telephone lines, and oil and gas pipelines; drawings of equipment; and blueprints of dams, buildings (such as railroad stations), and bridges; as well as photographs of the construction of transmission poles and the construction and operation of dams and railroad lines. (Note: oversized maps, drawings, diagrams, charts, and blueprints, as well as photographs have been filed separately. For locations and for more complete descriptions of these items see P.U.C. Map Book.) Between 1917 and 1920, the exhibit room staff of the C.R.C. composed lists of the exhibits in each application proceeding (including a brief description of each exhibit and its date of submission). Where these lists still exist they have been filed in the first folder of exhibits in a particular application to act as a table of contents. The exhibits are arranged in the order they appear in the exhibit list. (Note: not all exhibits listed still exist.)

C.R.C. Engineer’s Valuation

Scope and Content Note
Report on the value of all the physical property of a utility, prepared by the Engineering Department. These reports usually include a map of the utility system, a description of the means by which values were set, a brief corporate history, a summary of the findings, and an extremely detailed valuation of all the physical property of a utility (including in the case of railroads the cost of railroad ties and spikes). These reports were the results not only of an investigation of company books, but also of on site investigations involving, in the case of railroads, traveling along every inch of the line noting all physical property. Valuations were extremely important in applications involving tariff rate changes and the sale of utilities. The Commission’s ability to reach an equitable decision was based on its ability to precisely judge the financial condition of the utility it was dealing with. In certain application proceedings C.R.C. valuations were numbered as exhibits and are therefore located with the exhibits, rather than filed separately. Such cases are duly noted below.

For further C.R.C. valuations see series entry 13, P.U.C. VALUATIONS, 1910-1926. Also see series entry 14, VALUATIONS FILED BY UTILITIES, 1930-1931.

Note: transcripts and, less frequently, exhibits can relate to more than one application. When this occurs the material is filed with the application it was originally filed with by the Commission. Other applications, or cases to which the material relates are listed immediately after the title of the application with which the material is filed. Such instances are cross-indexed.
App. No. 1 IN THE MATTER OF THE APPLICATION OF CENTRAL CALIFORNIA GAS COMPANY FOR CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND PERMISSION TO EXERCISE FRANCHISE RIGHT TO BE SECURED FROM THE CITY OF LINDSAY AND TO ISSUE BONDS HAVING THE FACE VALUE OF $40,000. Decided May 30, 1912.

11. SPECIAL STUDIES. 1937-1956.

Physical Description: 7cf.

Scope and Content Note

Arranged by special study number in ascending order. Materials composing a special study arranged in the following order: reports placed first, followed by correspondence (including memoranda), arranged in reverse chronological order thereunder.

Investigations carried out by the Utilities Division in connection with informal complaint, formal complaint, and formal application proceedings; to obtain information on general financial conditions affecting utilities (such as taxation and business depressions); and to examine existing and estimated future gas and electric output within the State and the ability of utilities to meet projected future demands. Of special importance were investigations into the operation of utilities. Before the 1930's, the Commission instituted on its own motion formal complaint proceedings to investigate the rate practices of specific utilities. In the 1930's, finding this practice too time consuming (a formal complaint proceeding often took several years), the Utilities Division began to institute periodic investigations into the operation of specific utility companies, frequently with the assistance of the Finance and Accounting Division. When rates were found to be too high, the findings of these investigations were used as the basis for informal negotiations with the companies for a reduction in rates.

During World War II the Division instituted numerous studies on behalf of federal agencies dealing with the production and rationing of natural gas and electricity, the use of communications systems, the security of utility installations, and the ability of utilities to respond to Civil Defense emergencies.

Materials comprising special studies arranged into following categories:

Reports

Scope and Content Note

composed of conclusions of staff members of Division on areas of investigation assigned to them for study, final reports by Division itself submitted to the Commission, and reports and other narrative statements received from utility companies or collected by the Division from sources outside the C.R.C. dealing with the subject under investigation.

Transcripts

Scope and Content Note

Copies of testimony of hearings held to question utility executives as to the nature of the operation, the financial condition, the fairness of rates, and the levels of production of utilities; and to receive complaints and/or suggestions from local elected officials and from the public about the quality of utility services and the acceptability of rates charged or proposed to be charged.
Correspondence

Scope and Content Note
Memoranda between Division staff discussing the nature and progress of investigations; and incoming and outgoing correspondence - including copies of letters from the Division requesting information from utilities on their operations, financial condition, levels of production, and reserves; replies by utilities; communications (during World War II) from Federal agencies requesting information on the condition of utilities, their production levels, and their security efforts; replies by the Division providing information requested by Federal agencies; and frequently a closing letter written by a Division staff member explaining how a Special Study was ended and what conclusions were reached.

Note: blue summary sheets exist for certain Special Studies listing the title of the investigation, its inclusive dates, whatever reports were generated, and what actions were taken by the Commission, if any. When such sheets exist they are placed in the first folder of the Special Study to which they relate.

Reports similar to those prepared in the course of Special Studies may be discovered in series entry 5, FORMAL COMPLAINTS, 1908-1932, series entry 6, FORMAL APPLICATIONS, 1912-1928, and series entry 12, REPORTS ON THE OPERATION OF UTILITIES, 1949-1969.

S-132 ELECTRIC RATE INVESTIGATION OF MASONIC HOME OF CALIFORNIA AT DECOTO. 1938-1940.

Physical Description: 1ff.

Scope and Content Note
Request by Masonic Home to know what, if any, economies could be made to save electrical generating costs.

Correspondence: memoranda between staff including a brief report on the nature of the electrical service provided at the Home, data on the amount of power used in 1938, and suggestions prepared by staff on how the Home could save energy costs. Includes a diagram of the location of the Home's generating plant.

Folder F3725:2763.

Physical Description: 1ff.

Scope and Content Note
Investigation of current (1938) plans and direction of the Central Valley Project and its probable effect on water supplies and electrical generation in the Valley. The study was used in reaching a decision in Application No. 31861, In the Matter of the Application of the San Joaquin and Kings River Canal and Irrigation Company for Authority to Enter into Contracts with the United States Government, et. al., decided March 20, 1939.

Reports: a staff report providing a history of State involvement in irrigation projects in the Central Valley; and reports by the Federal Power Commission on the power potential of California rivers prepared with the help of the P.U.D. staff.

Correspondence: brochures and bulletins prepared by various State agencies describing the Central Valley Project, and a copy of a contract between the United States Department of the Interior and Miller and Lux Company for the purchase of water rights.

S-141 SERVICE INVESTIGATION OF MAJOR TELEGRAPH UTILITIES IN CALIFORNIA. 1939-1942.

Physical Description: 1ff.

Scope and Content Note
Study into means of upgrading telegraph service within the State of California.

Reports: summary report on telegraph service (1940) - prepared by Telephone and Telegraph Division. Includes a discussion of the possible effects of war on telephone service and the maximum capacity for handling messages.

Correspondence: memoranda summarizing conclusions of investigation, analysis by staff of data submitted by telegraph companies on increased service demands; correspondence from companies complaining about the expense of providing information requested by Commission; and data provided by companies on their revenues and operating expenses.
Folder F3725:2765-2768.

S-152  REVIEW OF PACIFIC GAS AND ELECTRIC COMPANY OPERATIONS - ELECTRIC OPERATIONS FOR 1939.

Physical Description: 3ff. and 1 Vol.
Scope and Content Note
Investigation of Pacific Gas and Electric Company, Electric Division, carried out in connection with negotiations with company for a reduction in rates.
Reports: statistical report prepared by Gas and Electrical Division (P.U.D.) for use in establishing a reduced rate schedule; and reports by P.U.D. staff on the operation of the company - including data on revenues, expenses, its rate base, and kilowatt production.
Correspondence: memorandum summarizing accomplishments of investigation; C.R.C. press release announcing a reduction of rates growing out of study; data provided by company on existing rates charged in various areas of Northern California; a schedule of reduced rates proposed by company; and minutes of meetings between P.U.D. staff and mayors of towns served by P.G.& E. in order to receive their views on rate levels.

S-153  SOUTHERN CALIFORNIA EDISON COMPANY - RESULTS OF OPERATION - YEAR 1938 AND ESTIMATED YEAR 1939. 1939.

Physical Description: 6ff.
Scope and Content Note
Investigation into company operations, relating to negotiations with company for a reduction in rates.
Reports: P.U.D. report on operation of company - including data on earnings, expenses, and rate base; a C.R.C. projection of estimated profits and expenses until the year ending May 30, 1941; a preliminary estimate by staff of the results of operation for 1939 (containing a corporate history); and a statistical report on the use of electric energy by orange growers.
Transcripts: (7 Vols.) - informal hearings held in Visalia, Los Angeles, Pomona, San Bernardino, Santa Barbara, Verdugo, and Santa Ana - held to hear complaints from consumers and city officials about company service and rates.
Correspondence: complaints from public on the inequality of the company's rate structure and complaints from town officials that company rate structure is unequal between different towns in Southern California; Commission proposal for a reduction in rates; memoranda by staff members summarizing complaints received from public; minutes of conferences held between P.U.D. staff and company officials to discuss a reduction in rates; and statistics gathered by P.U.D. staff on wages, estimated kilowatt sales, and income of company; and summaries of informal conference between staff to discuss study.

Folder F3725:2775-2777.

Physical Description: 3ff.
Scope and Content Note
Study carried out in relation to negotiations for a reduction in rates.
Reports: P.U.D. staff inventory and appraisal of company fee lands and right of way; staff proposals for long range downward readjustments of domestic and commercial lighting rates; statement by T.A. Hunter arguing for reduced rates by comparing California Edison Company rates with those of the Tennessee Valley Authority; and a preliminary report by P.U.D. staff on the predicted profits and expenses of the company for 1941.
Transcripts: (3 Vols.) - informal hearings between staff, company officials and Farm Bureau representatives dealing with the legitimacy of rates charged.

S-258 UTILIZATION OF NATURAL GAS IN CALIFORNIA. 1940-1946.

Physical Description: 3ff.
Scope and Content Note
With the imminent possibility of war, and later with war itself, it was urgently necessary to obtain information on the ability of the gas industry to handle sharply increased load demands. This study deals with the utilization of gas reserves. Information gathered in study used in Case No. 4591, which had for its purpose the control of industrial gas usage sold on an interruptable basis. Also see S-525 dealing with the extent of natural gas reserves in the State.
Report: staff report on the utilization of natural gas in California - containing both narrative and statistical information on production, classes of service, sales, revenues, customer use characteristics, and a description of the transmission system within the State. Includes a map of gas transmission lines and storage areas in the states as of 1944.
Correspondence: comprised of memoranda on levels of natural gas supplies and their adequacy in meeting projected needs; communications from gas companies on expanded production programs; minutes of State Council on Defense meetings dealing with the matter of gas supplies; and memoranda between staff members discussing means of reducing gas wastage.

S-259 SACRAMENTO RIVER FARMS, INC. - REVIEW OF EARNINGS - ELECTRICAL DEPARTMENT. 1940-1941.

Physical Description: 1ff.
Scope and Content Note
Investigation carried out in relation to company request for a change in its tariff schedule.
Report: Gas and Electric Division study on the operation of the company - containing a brief history of the company.
Correspondence: staff memoranda dealing with the revenues and expenses of the company; a tariff schedule proposed by the company; and minutes of a conference between C.R.C. staff and company officials to discuss tariff rates.

Physical Description: 3ff.
Scope and Content Note
Investigation into rates charged by company.
Report: preliminary estimate of results of operation for 1941 - containing map of system and data on revenues and expenses (prepared by Gas and Electric Division, P.U.D.).
Transcripts: (2 Vols.) meetings with public, company officials and civic leaders held in San Francisco and Sacramento to receive suggestions and opinions.
S-282 INVESTIGATION OF DEFENSE PROBLEMS OF THE COMMUNICATION SYSTEM IN CALIFORNIA.

Physical Description: 1ff. and 6 Vols.

Scope and Content Note
Study of the probable effects of war on California’s communication system, with special interest in the question of security and problems created by a war-generated population boom.

Reports: 6 indexed volumes - containing bulletins from a national defense study of communication utilities; copies of the California Defense Digest containing articles dealing with the security of utilities; California State Defense Council bulletins dealing with protective measures for utilities; replies to questionnaires sent to communication companies dealing with their security measures and their efforts to screen employees; minutes of subcommittee on Communications of State Council on Defense (many P.U.D. staff members belonged to the subcommittee) dealing with the problem of sabotage; bulletins of Federal agencies (marked restricted) dealing with protective measures for utilities; and confidential security instructions distributed to the employees of the Bell System.

Correspondence: copies of suggestions made by Commission staff to utilities for improving security (such as putting up no trespassing signs); and a press release of the Commission dealing with the need of giving priority to air warning stations in rural telephone communication systems.

Filed separately: map of telephone exchange areas in the State of California as of 1941. See P.U.C. Map Book.

S-302 STUDY OF DEFENSE PROBLEMS OF WATER COMPANIES OF CALIFORNIA.
1941-1943.

Physical Description: 5ff.

Scope and Content Note
Study intended to compile a list of all water systems in the State and to map their service areas as part of a plan to develop a cooperative mutual aid program to insure that water supplies would not be curtailed during wartime emergencies.

Reports: summary report by P.U.D. staff listing all water producers in the State by counties and zones within counties - includes maps showing the location of companies and of all artesian wells in the State; confidential report of the Water Committee of the State Council on Defense on the adequacy of water systems in the San Diego region, and a similar report on the City of Benicia - both including information on the vulnerability of facilities to sabotage; a C.R.C. report on the means available for the protection and maintenance of water supplies under wartime conditions; and a bound volume of replies from water companies (arranged alphabetically by name of company) to Commission requests for opinions on a proposal for reduced rates for victory gardens.

Correspondence: memoranda between staff members providing lists of all municipally owned water systems; estimates by staff of the cost to utilities of providing increased security; lists of all dams in state; report by staff on effect of Federal priority rating system for water in state; and petitions from public for state support to provide armed protection for San Joaquin Dam.

S-304 STEPS TAKEN IN PROTECTION OF GAS UTILITY PROPERTY IN ORDER TO INSURE CONTINUITY OF SERVICE DURING THE WAR EMERGENCY. 1941-1942.

Physical Description: 1ff. and 1 Vol.
Scope and Content Note
Study to prepare recommendations in order to provide additional safeguards to gas facilities. Study made in coordination with the State Council on Defense and Federal agencies.
Report: P.U.D. staff report on the defense needs of individual gas utility properties - including a map of gas systems in need of protection; and reports on the security practices of the Coast Counties Gas and Electric Company, Southern California Gas Company, and Pacific Gas and Electric Company.
Correspondence: communications from individual utility companies explaining their security efforts and suggesting means by which the state could improve security (such as removing known dangerous Japanese-Americans from the West Coast); a confidential report from the Federal Power Commission on the security situation in and around natural gas systems in California; and reports and recommendations to gas companies from the Commission staff on means of improving security.

Folder F3725:2824.

S-305 STEPS TO BE TAKEN IN PROTECTION OF ELECTRIC UTILITY PROPERTY IN ORDER TO INSURE CONTINUITY OF SERVICE DURING THE WAR EMERGENCY. 1941-1943.

Physical Description: 1ff.
Scope and Content Note
Study to ascertain what steps utilities must take in order to restore service in case of damage or destruction of electric facilities by sabotage or other enemy action. Also intended to develop suggestions for means of reducing the risk of sabotage through stricter security.
Report: summary report on investigation prepared by Gas and Electric Division describing electric utility systems in the state and recommending means of restoring service in an emergency. Contains maps of the state's electric transmission systems.
Correspondence: memoranda between staff members discussing various means of handling wartime emergencies; recommendations by Commission to utility companies for means of tightening security (such as fingerprinting employees); and a list compiled by P.U.D. staff of all privately owned generating plants of an output of over 500 K.W.H. to be used as alternate sources of power in the advent of an emergency.

S-306 NATIONAL DEFENSE - SURVEY OF STATE GUARD REQUIREMENTS PREPARED FOR JOINT LEGISLATIVE COMMITTEE. 1942.

Physical Description: 2ff. and 1 Vol.

Scope and Content Note
Extensive study into means of guarding electric utilities from the threat of alien sabotage. Prepared for the Joint Legislative Budget Committee which was examining the possibility of providing National Guard protection to utility installations to protect them from attack by Japanese-American aliens. The danger was considered passed in 1942, when all dangerous aliens had been removed from the coastal region.

Reports: series of reports prepared by P.U.D. staff examining existing security practices of electric utilities and recommending tighter security practices - reports express fears about the proximity of Japanese-American relocation camps in Owens Valley to hydroelectric facilities. Also included under reports are working papers of the Telephone and Telegraph Division, comprising notes used in preparing reports, pamphlets on security procedures for utilities prepared by federal and state defense agencies, and estimates by Division staff of the cost of increased security to utilities.

Correspondence: memoranda between staff members discussing different means of preventing sabotage; estimates of guard requirements of electric facilities; and minutes of conference between Governor Earl Warren and defense agencies to discuss the protection of utilities.

Folder F3725:2828-2832.

Physical Description: 5ff.

Scope and Content Note
In 1942, the War Production Board issued Natural Gas Limitation Order L-31 to control the consumption of natural gas through a system of gas rationing. This special study was instituted to examine the effectiveness of the rationing program.

Minutes
Scope and Content Note
Contains copy of order L-31 and minutes of meetings between P.U.D. staff and utility company executives to discuss the implementation of the program.

General Correspondence
Scope and Content Note
Copies of Federal Production Board orders; memoranda between staff members on the advisability of reconversion of heating in state to natural gas after the war; outlines of conferences held by Commission with utility officials to spell out the meaning of Federal orders; surveys by C.R.C. of electric utilities' cooperation with the Federal rationing system; estimates by staff of peak times for critical gas demands; and C.R.C. press releases explaining Federal procedures.

Coast Counties Gas and Electric Company
Scope and Content Note
Data collected by P.U.D. staff on gas sales, daily peak loads, and customer usage; copies of company procedures used in attempting to comply with L-31 by establishing reduction priorities; and complaints from public on inequalities in rationing system of company - copies of replies from Commission included.
Pacific Gas and Electric Company
Scope and Content Note
Communications from company explaining the firm's rationing plans; and a circular mailed to consumers explaining rationing system.

Southern California Gas Company
Scope and Content Note
Lists of preferred customers under rationing system and data on company revenues under present and proposed preferred industrial schedule. Both provided by company.

Correspondence with T. McChubb
Scope and Content Note
Western Area Chief, Natural Gas Division, United States Office of War Production - copies of letters sent by McChubb to gas companies explaining Federal rulings, copies of communications from gas companies to McChubb recommending improvements of rationing system and providing statistics on gas usage; letters from McChubb to Commission recommending the role it might play in the rationing system; and copies of correspondence sent by the Commission to McChubb providing information he requested on the natural gas situation in California and the effectiveness of rationing.

L-50 established priorities for the receipt of telephone service. Study was instituted to keep track of the degree to which telephone service had been curtailed. Investigation was officially closed in August, 1943. However, periodic reports from utilities on the number of service order held continued to be filed under S-321 until 1952.

Correspondence: before 1943 - lists of number of service orders held (by city); communications from public utility commissions of other states on their approaches to service interruptions; and releases of the War Production Board dealing with L-50; after 1943 - reports from utilities on the number of order held; communications from Federal Civilian Production Planning Board on the nationwide telephone service situation - recommending companies expand their facilities; data compiled by Commission on projected population growth in the State through 1950; and minutes of conferences between C.R.C. staff and utilities officials to discuss the removal of Federal controls and the building programs of utility companies.

Folder F3725:2838. S-355 PROGRAM FOR VICTORY GARDENS AND RECOMMENDED WATER RATE REDUCTIONS IN CONNECTION THEREWITH. 1942-1945.

Physical Description: 1ff.
Scope and Content Note
Study to determine the feasibility of lower water rates for those consumers growing victory gardens. Seventy-three utilities eventually agreed to the special rates. Also see S-302.
Report: Hydraulic Division report on victory garden rates suggesting various means by which utilities could lower rates to victory garden growers.
Correspondence: copies of requests by Commission to water companies for the institution of a Victory Garden program; replies by water companies to C.R.C. circular informing the Commission whether or not the utility has or intends to institute such a program; and letters from the public requesting information on the program - copies of Commission replies included.

Folder F3725:2839. S-360 DEFENSE TEST INCIDENT DRILLS OF SOUTHERN CALIFORNIA. 1943.

Physical Description: 1ff.
Scope and Content Note
Study of utilities' responsiveness during Civilian Defense Training drills.
Correspondence: memoranda prepared by P.U.D. staff providing statistical information on the time it took various utilities to respond during drills and describing the nature of drill, the location of mock bombing, and the hypothetical damage caused (including maps of bomb craters); and memoranda describing the difficulties in preparing drills and suggesting means by which they could be improved.

Folder F3725:2840-2841. S-363 DEFENSE TEST INCIDENT DRILLS OF NORTHERN CALIFORNIA. 1943.

Physical Description: 2ff.
Scope and Content Note
Study of effectiveness of utilities in responding during Civilian Defense training drills.
Reports: Vol. 1 - Northern and Central California, Vol. 2 - San Francisco Bay Area - containing memoranda describing mock attacks and the time it took utilities to respond - includes maps showing location of bomb damage. Both reports contain suggestions by C.R.C. of means by which the drills could be improved.
Folder F3725:2842. S-364 LIST OF PUBLIC UTILITIES SERVING CITIES AND COMMUNITIES AS OF JANUARY 1, 1943. 1943-1944.

Physical Description: 1ff.
Scope and Content Note
Study instituted to revise previous list of public utilities providing electricity, telephone and telegraph, and water services within the state.
Report: list of all public utilities in the state as of January 1, 1943, prepared by P.U.D. staff.

Folder F3725:2843-2849. S-365 CENTRAL CALIFORNIA PROJECT STUDIES. 1943-1946.

Physical Description: 4ff. and 1 Vol.
Scope and Content Note
Investigation into the probable impact of the Central Valley Project on the Central and San Joaquin Valleys. Public Utility Department staff members participated in a project involving experts from several state agencies and universities in the preparation of a massive twenty volume report on the degree of completion and the proposed future development of the water project. A Special Study number was assigned to contain notes and other materials collected by staff members while working on writing project.
Report: a bound volume of population reports prepared by the Population Committee of the Central Valley Project study. Includes incredibly detailed narrative and statistical descriptions of the growth of the state's population through its history, broken down by race, religion, ethnic background, place of birth, and sex. Also contains statistical information on births and deaths, and data on the expansion of industry and agriculture. Includes projections of future growth trends.
General Correspondence: chart showing C.R.C. staff participation in the Central Valley Project Study; a C.R.C. prepared summary of California electric demands and loads (June 1943); data provided by Pacific Gas and Electric Company on its system load for 1943-1944; and an oversized map filed separately.
Study Area Correspondence: note and memoranda of staff members used in preparing reports in the following subject areas (materials arranged in following order): (3) - use of project power, (5) - acceleration of construction, (7) - postwar construction, (8 & 9) - power and irrigation costs, (15) - rates for project power, (16) - price of project water - includes an oversized document filed separately, (21) - land assessments in areas of rising water table, and (22) - control of water well drilling.
Filed separately: from General Correspondence - map of Central Valley basin showing lands under irrigation; from Study Area Correspondence (16) - map of Southern San Joaquin Valley showing lands judged to be capable of being irrigated. See P.U.C. Map Book.

Physical Description: 44ff.
Scope and Content Note
Arranged alphabetically by name of company and chronologically thereunder.
Reports on the operation and financial condition of gas, electric, water, and communications utilities, prepared in connection with formal complaint and application proceedings, or as a result of special studies by the Utilities Division. Individual reports were prepared primarily by the Utilities Division, occasionally with the assistance of the Finance and Accounting Division.

Majority of series composed of reports on the results of operation of utilities, usually containing a short corporate history; a description of existing and proposed operations; data on revenues, expenses, taxes, and the utility's capital rate base; and conclusions and recommendations made by the P.U.C. staff. Also included in series are appraisals, reproduction valuations, audits, and compliance reports (dealing with the extent to which utilities were attempting to comply with the Commission's decisions). Certain reports contain maps of service areas, charts, diagrams, and photographs of buildings and equipment.

Similar reports can be found in series entry 5, FORMAL COMPLAINTS, 1908-1932, series entry 6, FORMAL APPLICATIONS, 1912-1928, and series entry 11, SPECIAL STUDIES, 1937-1955.

General Engineering Branch

Physical Description: 14ff.
Scope and Content Note
Arranged alphabetically by name of company.

Appraisals of the value of the physical properties of gas, electric, and telephone and telegraph companies (historical and/or reproduction value). Probably prepared for Formal Complaint or Application proceedings.

Further valuations can be found in series entry 5, FORMAL COMPLAINTS, 1908-1932; series entry 6, FORMAL APPLICATIONS, 1912-1928; and series entry 14, VALUATIONS FILED BY UTILITIES, 1930-1931.

Physical Description: 3ff. and 15 Vols.
Scope and Content Note
Arranged alphabetically by name of company.

Appraisals and historical and reproduction valuations prepared and submitted by utility companies, frequently including photographs and/or maps. May have been exhibits in formal complaint cases for formal applications.

Folder F3725:400.  **14a. ELECTRIC PLANT CLASSIFICATION REPORT. 1940.**

- Physical Description: 1 Vol.
- Scope and Content Note
  
  Volume comprises the reports of the Pacific Gas and Electric Company, San Joaquin Light and Power Co., and the Midland Counties Public Service Co. containing detailed corporate histories; and statements of the original cost of fixed capital in service, of electrical plant properties, and of equipment in service as of December 31, 1937.

**Gas and Electric Branch**

Folder F3725:2992-2994.  **15. CORRESPONDENCE (Incoming and Outgoing). 1919-1924, 1937.**

- Physical Description: 3ff.
- Scope and Content Note
  
  Arranged by P.U.C. numeric subject code. See subject file number key (F3725:13).
  Communications from and to the public dealing with complaints or requests for information involving gas and electric services, the installation of meters, and charges for the above mentioned services. Copy of Commission's reply attached to letters received.

Folder F3725:2995-2998.  **16. GENERAL ORDER 58-A - GAS ACCIDENTS. 1942-1960.**

- Physical Description: 3ff.
- Scope and Content Note
  
  Arranged by company in order listed in index in first folder.
  Under the provisions of C.R.C. General Order 58-A, gas companies were required to report on gas related accidents or interruptions of service. Series contains reports by companies describing the nature of the accident (often including a map or diagram of the location) and memoranda between staff members and the Utilities Division Directors dealing with the veracity of company reports and the results of Gas and Electric Branch investigations.

**Communications Branch**

Folder F3725:2999-3030.  **17. WORKING PAPERS. 1958-1959.**

- Physical Description: 2cf.
- Scope and Content Note
  
  Arranged by Formal Application number in ascending order.
  Notes and other materials accumulated during investigations in preparation for Formal Application proceeding involving telephone and telegraph companies. Composed of copies of applications, decisions, and in some instances exhibits; reports by Branch staff members; and handwritten notes by staff members containing a substantial amount of information on the operations of the companies involved.
  Series contains materials relating to Application Nos. 40192, 40207, 40238, 40219, 40249, 40251, 40334, 40385, 40398, 40431, 40441 (and Case No. 6334), 40493, 40686, 40810, 40875, 40914, 40934, 40994, 41070, 41178, and 41198.
  Also see series entry 6, FORMAL APPLICATIONS, 1912-1928.
18. TELEPHONE EXCHANGE MAPS. 1926-1929.

Physical Description: 2cf.

Scope and Content Note
Maps relating to Northern California placed first, maps relating to Southern California placed thereafter; arranged alphabetically by name of county thereunder.

Rate exchange area maps (each comprising a county or portion of a county) submitted by the Pacific Telephone and Telegraph Company. Each map shows rate district boundaries and the location of district exchange.

Not a complete series. Contains only a few rural counties of Northern California and most, but not all, Southern California counties.

Transportation Division

Physical Description: 5½cf.

Scope and Content Note
Organized in following order: formal complaint papers placed first (arranged by case number in ascending order), formal application papers thereafter (arranged by application number in ascending order), and special studies thereunder (placed in chronological order by date of initiation of study).

Memoranda, notes, drafts of reports, statistical data and surveys generated during special investigations of the Transportation Division of the Engineering Department (pre-1937 organization, see Chart I), frequently carried out in conjunction with formal complaint cases or formal applications.

Series composed of investigations relating to railroad operations in Los Angeles, ferryboat operations on San Francisco Bay, and plans for the construction of the Golden Gate and San Francisco-Oakland Bay Bridges.
Case No. 970 971 972 974 980 981 983 THE MUNICIPAL LEAGUE VS. THE SOUTHERN PACIFIC CO., ATCHISON, TOPEKA, AND SANTA FE RAILWAY CO., AND SAN PEDRO, LOS ANGELES AND SALT LAKE RAILROAD CO.; 971 CENTRAL DEVELOPMENT ASSOCIATION OF LOS ANGELES VS. SOUTHERN PACIFIC CO., ET. AL.; 972 THE CITY OF PASADENA VS. PACIFIC ELECTRIC RAILWAY CO., SOUTHERN PACIFIC RAILROAD CO., ATCHISON, TOPEKA AND SANTA FE RAILWAY CO., SAN PEDRO, LOS ANGELES AND SALT LAKE RAILROAD COMPANY AND THE CITY OF LOS ANGELES; 974 THE CITY OF PASADENA VS. PACIFIC ELECTRIC RAILROAD CO., ET. AL.; 980 THE CITY OF SAN GABRIEL VS. PACIFIC ELECTRIC RAILROAD CO., ET. AL.; 981 CITY OF SOUTH PASADENA VS. PACIFIC ELECTRIC RAILROAD, ET. AL.; and 983 IN THE MATTER OF THE APPLICATION OF SOUTHERN PACIFIC COMPANY AND LOS ANGELES AND SALT LAKE RAILROAD COMPANY FOR APPROVAL OF AN AGREEMENT FOR JOINT TERMINAL FACILITIES IN LOS ANGELES. 1916-1945.

Physical Description: 2cf.
Scope and Content Note
In 1916, upon a complaint filed with the Commission by the Los Angeles Chamber of Commerce and other civic groups (Formal Complaints 970, 971, 972, 974, 980, 981, 983), the C.R.C. instituted proceedings with the objective of making an order compelling the various railroads operating in Los Angeles to combine their operations at one union terminal, and to eliminate hazardous railroad crossings. The issues raised by these cases were argued before the Interstate Commerce Commission (I.C.C. Docket No. 14,778 and Finance Docket 3569), the State Supreme Court (S.F. Nos. 13056-13058), The United States District Court for the Northern District of California, Southern Division (Docket No. 3308-L), and before the Supreme Court of the United States (Docket 3308-L, see 283 U.S. Reports, page 380). (For histories of these proceedings and their full titles, see file F3725:3225.)

Series comprises memoranda, abstracts, reports, notes, and drafts compiled by the Los Angeles office of the Transportation Division in the preparation of exhibits for the above named legal proceedings, and in the drafting of the Commission's own Plaza Plan for the proposed Union Terminal.

Materials collected contain information on the operation of railroads and railroad yards in Los Angeles, the volume of passengers carried, the traffic situation in downtown Los Angeles in the 1920's and the growing use of the automobile, downtown property values, the construction of Union Terminal, and the planning and construction of the Los Angeles Civic Center.

Records organized into the following categories in the following order:

Folder F3725:3225. Histories (1938, 1945, Undated).

Physical Description: 1ff.
Scope and Content Note
Memoranda providing background on the legal proceedings.

Folder F3725:3326-3329. Legal Documents (1916-1935)

Physical Description: 3ff.
Scope and Content Note
Copies of decisions, legal briefs, and petitions from legal proceedings.
See P.U.C. Map Book for map of downtown Los Angeles showing location of S.P. Co. and P.E. Ry. Co. tracks in the area of the proposed terminal (1918).
Folder F3725:3230. **Railroad Agreements (1933-1934, 1942).**
- Physical Description: 1ff.
- Scope and Content Note
  Copies of agreements between railroads for the joint construction and operation of Union Station.
  For maps (2) of proposed Los Angeles Railway Loop Station and sites proposed for Federal Post Office, see P.U.C. Map Book.

Folder F3725:3234-3235. **Memoranda, Abstracts & Weekly Reports (1917-1920, 1932-1945).**
- Physical Description: 2ff.
- Scope and Content Note
  Memoranda dealing with the level of freight and passenger traffic, the valuation of property, interviews with yardmasters on the operation of railroad yards, and reports on the practicality of various station proposals, and on the progress being made on the construction of Union Terminal.

Folder F3725:3236-3236a. **Reports - Misc. (1916-1919).**
- Physical Description: 1ff.
- Scope and Content Note
  Summaries of testimony presented at Commission hearings, a proposal for a unified transit system in Los Angeles, and a draft of specifications for C.R.C. proposed Plaza Plan.
  For map of territory annexed by City of Los Angeles (1916), see P.U.C. Map Book.

Folder F3725:3231-3233. **Correspondence re. U.S. Post Office. 1935.**
- Physical Description: 1ff.
- Scope and Content Note
  Memoranda between C.R.C. staff members and incoming and outgoing correspondence with Treasury Department officials, petitions, a sketch of a proposed new post office and oversized documents filed separately.
  Filed separately: a plat of the proposed Los Angeles Railway Loop Station at the site of the Union Terminal, and a photostatic reproduction of a map of the proposed site of a U.S. Post Office at the Union Terminal.

Folder F3725:3237. **E.G. Allen's (A.T. & S.F. Ry. Engineer) Notes (1924-1926).**
- Physical Description: 1ff.
- Scope and Content Note
  Confidential notes on the proposed lowering of the Santa Fe Railway tracks along the Los Angeles River. Also data on Santa Fe train arrivals and departures.

Folder F3725:3238-3239. **G.S. Hill's (C.R.C. Engineer) Working Papers (1924-1926).**
- Physical Description: 2ff.
- Scope and Content Note
  Memoranda, notes, rough drafts, charts, abstracts of testimony diagrams, and trackage maps relating to the estimated total cost of building the Commission proposed Plaza Plan for Union Terminal.

Physical Description: 4ff.
Scope and Content Note
Statistical charts, drafts of exhibits, notes, and reports regarding traffic patterns in downtown Los Angeles and the probable effect of various Union Terminal proposals on traffic patterns.
See P.U.C. Map Book for three isochronal map diagrams of traffic flows in downtown Los Angeles (n.d.).

Folder F3725:3244a-m. H.G. Weeks' (C.R.C. Engineer) Working Papers - Photographs (1918).

Physical Description: 13ff.
Scope and Content Note
Photographic album placed first, thereafter negatives and glass plates. Arranged thereunder by photograph number (see index to album).
Indexed volume of photographs and corresponding negatives and glass plates showing Los Angeles railroad stations, grade crossings, freight depots, yard facilities, rolling stock, and street scenes.

Folder F3725:3245-3257. Railroad Data (1904-1918).

Physical Description: 2ff.
Scope and Content Note
Southern Pacific Company, Santa Fe Railway, Pacific Electric Railway, and Salt Lake and Los Angeles Railway charts listing tonnage of freight shipped, passengers carried, and capacities of railroad yards; plats of proposed connections between different companies' tracks; blueprints of standard roadbeds, buildings, and station layouts (S.P. Co.), and valuation of railroad owned property.
For plats and profiles of Los Angeles train yards and ships, see P.U.C. Map Book.

Folder F3725:3258-3264. Immediate Unification on Santa Fe Site (1918-1919).

Physical Description: 1ff.
Scope and Content Note
Recommendations of the United States Director of Railroads for the unification of all Los Angeles railroads under his control, maps of proposed unification of facilities, specifications, report on proposed operation, and estimates of cost.
For blueprint of proposed station, plats of station grounds, and connections between different railroad companies' tracks, see P.U.C. Map Book.

Folder F3725:3265-3268. Chicago Data (1919-1920).

Physical Description: 1ff.
Scope and Content Note
Memoranda and reports dealing with the possibility of using the Chicago Union Station as a model for the Los Angeles Union Station.
Filed separately: alignments and perspective view of Union Station in Chicago. See P.U.C. Map Book.

Folder F3725:3269-3272. Passenger Terminal Data (1926).

Physical Description: 1ff.
Scope and Content Note
Estimates of cost of land and construction, dimensions of proposed Plaza Plan and data on train schedules to and from Los Angeles.
Filed separately: a survey of the destination and origin of all passengers on P.E. Ry. commuter trains, maps of proposed Plaza Plan, and profile of S.P. Co. lines in Los Angeles. See P.U.C. Map Book.
Folder F3725:3273-3274. **Freight Shipment Data (1917-1918).**
Physical Description: 2ff.
Scope and Content Note
C.R.C. surveys of freight shipments, freight switching and industries served in Los Angeles. Includes plats of all S.P. Co. sidings in Los Angeles and survey forms on the time freight cars spent on industrial sidings.

Folder F3725:3275-3277. **Land Valuation (1918-1921).**
Physical Description: 1ff.
Scope and Content Note
Memoranda and reports generated by C.R.C. in an attempt to establish value of property owned by railroads and property needed to be obtained under various station proposals.
Filed separately: two maps of property owned by railroads in Los Angeles. See P.U.C. Map Book.

Folder F3725:3280-3281. **Building Appraisals (1918-1919).**
Physical Description: 2ff.
Scope and Content Note
Memoranda and reports dealing with the exact value of buildings owned by railroads and buildings to be obtained under various station plans. Includes schedules of building values, sketches of the exact location of property, and photostats from Los Angeles Property Books showing the locations of buildings in downtown Los Angeles.

Folder F3725:3282-3286. **Estimates (1917-1920, Undated).**
Physical Description: 2ff.
Scope and Content Note
Correspondence, memoranda, reports and notes relating to the Commission's effort to fix the exact cost of various proposed station plans. Includes report on unit prices used in estimates and the Fiske Book containing cross sections of the proposed depression of Santa Fe Railway tracks along the Los Angeles River.
Filed separately: three maps of proposed interlocking systems between railroads. See P.U.C. Map Book.

Folder F3725:3287. **Division of Cost Between Railroads (1920).**
Physical Description: 1ff.
Scope and Content Note
Memoranda, notes and reports relating to C.R.C. effort to establish a fair division of the cost of a Union Station between the Los Angeles railroads.

Folder F3725:3288-3289. **Abstracts of Testimony (1918-1926).**
Physical Description: 2ff.
Scope and Content Note
Summaries of most important testimony presented at Railroad Commission hearings.

Folder F3725:3290. **Newspaper Clippings and Photocopies (1917-1919, Undated).**
Scope and Content Note
Newspaper articles dealing with various legal proceedings involving the Union Station and photocopies of a painting and bird's-eye views of the proposed Los Angeles Civic Center.

Folder F3725:3291-3309. Evidence Collected by C.R.C. (1924-1933, Undated).
Scope and Content Note
Misc. maps and blueprints collected by Engineering staff in preparation of court exhibits. Includes plans of proposed stations and maps of railroad lines, yards and facilities in Los Angeles.
See P.U.C. Map Books for locations and further descriptions of individual maps.

Folder F3725:3314-3333. Station Plans - Other Cities (1908-1923, Undated).
Scope and Content Note
Floor plans and plats of stations throughout the United States. Plans collected as models for Plaza Plan.
See P.U.C. Map Book for descriptions of individual maps and for locations.

Filed separately: a sheet showing cross sections and a side view of the ferryboat and its prop and rudder assembly, and the complete blueprints of the ferryboat Peralta. See P.J.C. Map Book.
SAN FRANCISCO BAY BRIDGE COMMISSION SURVEYS. 1929-1930.

Physical Description: 1ff.

Scope and Content Note
Surveys carried out by Railroad Commission for the joint Federal-State Bay Bridge Commission (charged with finding the proper location for a Bay Bridge).
Rough notes of traffic analysis surveys of the destination and origin of passengers traveling from East Bay to San Francisco on ferryboats, and notes on an analysis of the revenues and expenses of East Bay commuter railroads used in calculating probable cost of a transbay commuter line across the proposed San Francisco Bay Bridge.
Includes memoranda describing means used to carry out surveys, instructions to field agents conducting poll, newsletters announcing ferryboat survey, and incoming correspondence from ferryboat companies providing data on passengers and cars carried.

GOLDEN GATE BRIDGE HIGHWAY DISTRICT SURVEY. 1930, 1935.

Physical Description: 1ff.

Scope and Content Note
Survey carried out by Railroad Commission of the number of passengers and vehicles traveling on ferryboats between San Francisco and Marin, their destination and origin.
Contains instructions to checkers and commutation company, sample survey card, data on passengers and vehicles traveling on individual ferryboats, estimates of cost of survey, and personnel and payroll study of the survey conducted in 1935.
Filed separately: final data sheets on the origin and destination of passengers from Marin to San Francisco and maps showing borders of districts used in the survey. See P.U.C. Map Book.

SAN FRANCISCO-OAKLAND BAY BRIDGE IMPACT STUDY. 1934-1938.

Physical Description: 4ff.

Scope and Content Note
Arranged chronologically.
Study made by Division of the probable impact of the San Francisco-Oakland Bay Bridge, with special emphasis on various plans for public transit use of the lower level of the bridge.
Comprises memoranda between staff members dealing with alternate transit plans and the proper voltage for use with trolleys; reports from the Public Works Department on the nature and progress of bridge construction, on alternate plans for a San Francisco transit terminal, and providing statistical data on the probable commuter usage of the bridge; and miscellaneous materials composed largely of toll schedules of other Northern California bridges.
Filed separately: maps of proposed locations for San Francisco terminal, maps of East Bay transit routes, and a cross section of the bridge tunnel. See P.U.C. Map Book.
Physical Description: 5cf.

Scope and Content Note
Organized alphabetically by name of railroad. Documents relating to each railroad placed in the following categories in the following order: valuation comparisons, C.R.C. Valuations, Valuations submitted by railroads, unit price data, memoranda, correspondence, field books, and supporting documents. Arranged chronologically thereunder unless otherwise noted below.

In 1912, the Commission instituted a series of Formal Complaint proceedings against all the railroad companies operating in California in order to establish the exact value of their physical properties for rate setting purposes. (See series entry 5, FORMAL COMPLAINTS, 1908-1932, Cases 131 to 213.) Series composed of materials collected by C.R.C. Engineering Department (pre-1937 organization) in the preparation of valuation reports presented at formal hearings.

Records arranged into following categories:

Valuation Comparisons
Scope and Content Note
Statistical charts comparing the figures arrived at in the C.R.C. valuation to those appearing in the appraisal prepared by the railroad company.

C.R.C. Valuation
Scope and Content Note
Copy or draft of final valuation of railroad arrived at by the C.R.C. Engineering Department. These reports frequently comprise a corporate history of the company, a map, a summary of the findings, and an extremely detailed original cost and reproduction appraisal of all the physical property of the railroad (including the value of spikes and ties). These reports have been maintained only when they do not exist in series entry 5, FORMAL COMPLAINTS, 1908-1932.

Valuation Submitted by Railroad
Scope and Content Note
Appraisal prepared by railroad company for submission to the Engineering Department of the Railroad Commission.

Unit Price Data
Scope and Content Note
List of prices of various materials and services used in calculating the value of the physical property of the railroad.

Memoranda
Scope and Content Note
Instructions to field inspectors, summaries of the progress of investigations, preliminary and supplemental valuation reports, and notes and comments on C.R.C. valuation reports by Engineering Department staff members.

Correspondence
Scope and Content Note
Requests by Engineering Department for information on the financing, operation, and original cost of the railroad company and replies by the railroad company providing information requested.
Field Books
Scope and Content Note
Notes made by assistant engineers on field investigations, including certain of the following - interviews with landowners bordering railroad right-of-ways dealing with the value of their property; information on the corporate history and the names and backgrounds of company officials; drawings of the construction of company-owned buildings; sketches of station facilities and sidings; and notes taken during survey of tracks of exact location of bridges, culverts, switches, sidings, and other facilities.
Books contain a great deal of valuable information on the development of towns bordering railroad lines.

Supporting Documents
Scope and Content Note
Materials submitted by railroad companies to the C.R.C. Engineering Department for consideration during its determination of the physical value of the company. Composed of some of the following - leases, construction contracts, copies of articles of incorporation, statements of expenditures on improvements, and photographs of company facilities.

Folder F3725:3433-3435. Amador Central Railroad Company. 1912-1913.

Scope and Content Note
See series entry 5, FORMAL COMPLAINTS, 1908-1932, Case 213.

Physical Description: 5000 maps.

Scope and Content Note
Maps arranged by P.U.C. map location number (i.e. 104-12) - for map numbers see P.U.C. Railroad Map Survey Card Catalog, Archives Search Room. The card catalog is divided into separate sections for alignments, profiles, and station plats; thereunder cards are arranged alphabetically by name of railroad, title of map, and geographic location.

In 1912, the Railroad Commission required all steam, electric, street and switching railroads to submit detailed, notarized maps of the location of their lines and facilities in California.

Series is composed of alignments showing the location of right of way, profiles illustrating track elevation, and station plats locating depots, yards, and other facilities. The maps also provide extremely accurate information on geographic features, ownership of land near railroad lines, and the location of structures near rights of way.

Maps vary in scale from 1"=100' to 1"=400', and in size from 2' by 4' to 3' by 65'. The largest portion of the collection dates from between 1910 and 1914.

The following railroads are represented:
Alameda Belt Line
Amador Central Railroad Co.
Arcata & Mad River Railroad Co.
Atchison, Topeka & Santa Fe Railway Co.
Boca & Loyalton Railroad (now Western Pacific, Loyalton Branch)
Bucksport & Elk River Railroad Co.

Folder F3725:3224.

Physical Description: 1ff.
Scope and Content Note
Arranged chronologically.
Reports on urban transportation problems within California prepared by planning commissions and transportation study groups, frequently with the aid of Commission personnel. Material obtained by Transportation Division for reference use.
Includes a detailed study of all steam, electric and bus transportation within the City of Sacramento; a general investigation of metropolitan transportation problems in California, a report on the relocation of grade crossings in the City of Stockton, and a study of travel characteristics within the San Diego metropolitan area.
Reports frequently contain maps, photographs and charts.

Rate Branch

Folder F3725:3116-3166.

Physical Description: 2cf.
Scope and Content Note
Separate subseries for subject file (incoming and outgoing) arranged by P.U.C. numeric subject code (see subject file number key, F3725:13) and, placed thereafter a chronological file. Chronological file, in turn, divided between memoranda placed first and general correspondence placed thereafter, both in reverse chronological order thereunder.
Contains correspondence from companies and individuals requesting information about filing of tariffs, the tariff rates of specific companies, and the legitimacy of tariffs charged by common carriers, railroads, intra-state airlines, river transport companies, warehouses, and wharfingers. Copies of Rate Branch replies are attached to incoming correspondence.
Memoranda involve communications from the branch head spelling out procedural changes and notes between staff members dealing with the legitimacy of specific tariffs filed.
The chronological file has been heavily screened. It contains correspondence similar, but not duplicate to what exists in the subject file.
For additional Rate Branch correspondence for the period between 1952 and 1958 inclusive, see Selected Archives Agency Index, PUBLIC UTILITIES COMMISSION-RATE BRANCH.

Engineering Operations Branch

Folder F3725:3536-3618.  

Physical Description: 6cf.
Scope and Content Note
Records placed in following categories in following order: program report; crossing surveys (first arranged by county, thereafter reports placed first followed by field notes, and organized by report number thereunder); and Form H reports (arranged alphabetically by railroad).

In 1916, the Commission instituted a survey of all railroad crossings with public roads within the state in order to improve public safety and reduce the number of vehicular accidents due to poor visibility or lack of adequate warning devices. The C.R.C. prepared 1500 reports describing over 10,500 crossings. Each report deals with an average of seven crossings along the line of a particular railroad.

Contains the following:

Folder (F3725:3535)  

Program Report
Scope and Content Note
Statement of the progress of the grade crossing program as of 1917. It explains the scope of the work, methods used, future goals, and recommendations made.

Folder (F3725:3536-3611)  

Crossing Surveys
Scope and Content Note
Copies of final reports describing the general condition of crossings, visibility, type of pavement, location, signal devices, curvature of track, and recommendations for improvement; protests to the information in reports by railroad or civic officials; and field notes of C.R.C. inspectors containing in addition to material placed in final reports, a sketch of each crossing and descriptions of accidents which had occurred there.
Form H Reports
Scope and Content Note
Descriptions of all publicly and privately used crossings which had not already been surveyed and assigned a crossing number as of 1929. Reports composed of charts listing the name of the crossing, the type of track, the nature of the protective device, if any, and comments by the inspector. Reports prepared for crossings along the Santa Fe Railway, the Pacific Electric Railway, the Southern Pacific Railroad, and the Western Pacific Railroad only (7 Vols.).

**25. GRADE CROSSING SURVEY MAPS. 1914-1932.**

Physical Description: 200 maps approx.

Scope and Content Note
See P.U.C. Map Book.

Arranged numerically by number of State Route (such as State Route #10).

Compilation of State Highway Commission alignments and profiles showing the exact location and elevation of crossings of State constructed roads with railroad routes. Maps list C.R.C. code numbers assigned to each crossing (drawn in with yellow pencil), and show the extent of highway right of way, crossing signals or other warning devices, the ownership of property along the right of way of the road, and frequently buildings near the roads. Most maps include a small key map illustrating the location of a particular road in relation to other roads in a given area of the State.

Included is a general survey map prepared by the C.R.C. showing the location of all railroad crossings with State highways within the State of California.

For descriptions and locations of individual maps, see P.U.C. Map Book.

**27. REPORTS PREPARED FOR CASES AND APPLICATIONS. 1961.**

Physical Description: 1ff.

Scope and Content Note
Arranged chronologically.

Reports on the service and operation of various transportation companies and of the meaning and intent of the Passenger Charter-Party Carriers' Act (Stats. 1961, ch. 2146). Reports prepared for Case No. 6855 and 7192 and Applications 43535 and 43547, involving the Southern Pacific Railroad Company, the San Diego Transit System, and the South Los Angeles Transportation Company.
28. COST FINDING STUDY. 1938.

Physical Description: 1ff.

Scope and Content Note
Printed report by Dr. Ford K. Edwards entitled, Study of Rail Cost Finding for Rate Making Purposes (San Francisco, 1938). Volume describes the proper methods for determining equitable freight and passenger rates for railroads. Designed for use in Formal Complaint and Application proceedings. Includes charts, diagrams, and graphs. (Mislabeled Case No. 4402 does not relate to that case.)

Includes an oversized map of the routes of all railroad lines in the State as of 1938, filed separately. See P.U.C. Map Book.

29. RAILROAD FREIGHT OPERATIONS REPORT. December 1, 1938.

Physical Description: 1 Vol.

Scope and Content Note
Printed 126 page report prepared by Norman A. Wood dealing with intra-state rail transportation in California, and particularly freight traffic. Intended to provide a general background for Dr. Ford K. Edwards' study of rail costs (see series entry 28, COST FINDING STUDY, 1938).

Contains information on milage of track operated by various railroads, total investments in equipment, operating expenses and revenues, milage, a general discussion of freight train operations, a description of the operation of each division of each railroad within the state, and data on the volume of freight handled by the various lines listed.

Includes maps of various divisions of each railroad and of the operations of freight yards. Also contains numerous charts and graphs containing statistical information on operating expenses, revenues, and amounts of freight shipped.

Filed separately are maps showing freight tonnage carried over various lines, freight routes, time schedules for freight shipments, and the number of competitive rail lines operating between various shipping points in the United States.

Finance And Accounts Division

Physical Description: 2ff.

Scope and Content Note
Arranged chronologically.

Includes audits and historical valuations prepared by the Finance and Accounts Division in preparation of Formal Complaint cases (no markings as to what cases they relate). Contains reports on all gas properties in the town of Gilroy; and on the gas and electric properties of the Coast Counties Gas and Electric Company, of the California Electric Power Company, and of the Southern Sierras Power Company.

Physical Description: 21ff.

Scope and Content Note
Arranged as follows: railroad companies placed first, utilities thereafter, highway common carriers last, organized alphabetically by name of company thereunder.

Forms submitted to the Finance and Accounts Division each month by common carriers, railroads, and utilities, comprising data on the volume of business over the last month and containing balance sheets on company finances. Series comprises a sampling of these reports composed of the following companies: Atchison, Topeka and Santa Fe Railway, Northwestern Pacific Railroad, Southern Pacific Railroad, Western Pacific Railway, Pacific Gas and Electric Company, Pacific Telephone and Telegraph Company, and Pacific Greyhound lines.

36. REFERENCE MAPS. 1907-1925.

Physical Description: 50 Maps.

Scope and Content Note
See P.U.C. Map Book.

Arranged geographically in following order: maps of world, maps of United States, maps of portions of United States, maps of California, maps of portions of California (maps showing portions of Northern half of state placed first), and maps of cities and counties. Maps of cities and counties are further organized alphabetically by name of city or county.

Maps collected for general reference use by Commission staff or in the preparation of C.R.C. official railroad map (see series entry 38, MAPS, BLUEPRINTS, AND CHARTS RELATING TO RAILROADS, 1909-1927). Contains illustrations of transportation systems of World and of the United States, including U.S. highway systems, proposed airline routes (1924), and postal routes. The numerous reference maps of California show forest lands, grading conditions (geographic conditions in various parts of state to be confronted in the construction of railroad lines), land claims, irrigated lands, state highways, and commercial and recreational lands.

Largest portion of material comprised of maps of cities and counties. City maps usually list street names and occasionally show the location of buildings. Certain of these maps may have relation to case or application proceedings, but lack identification.

For a description of each individual map, see P.U.C. Map Book.
37. ROAD MAPS OF COUNTIES. 1922-1926.

Physical Description: 55 Maps.
Scope and Content Note
See P.U.C. Map Book.
Arranged alphabetically by name of county.
Automobile association maps of every county in California, showing the location of cities, highways, county roads, and wagon roads. The Commission was responsible for the regulation of common carriers using the State's roads and highways. It maintained this collection for reference purposes.
For a further description of maps, see P.U.C. Map Book.

38. MAPS, BLUEPRINTS AND CHARTS RELATING TO RAILROADS. 1909-1927.

Physical Description: 150 Items.
Scope and Content Note
See P.U.C. Map Book.
Arranged geographically in the following order: map of railroads of Western Unites States; maps of the railroads of California; and maps, blueprints, and charts relating to individual California railroads. Material relating to specific California railroads further arranged as follows: steam railroads placed first, electric railroads thereafter, organized alphabetically by name of railroad thereunder.
Maps showing railroad routes, lines of street railways, and location of railroad facilities such as yards, workshops, and stations; plans of facilities such as stations, freight depots, and trestles; and charts and diagrams containing information on the valuation of railroads and on passenger usage. Certain of these items may have been filed as exhibits in complaint or application proceedings, but lack identification.
Of special interest are copies of the 1915, 1922, and 1926 editions of the official C.R.C. railroad map of California - showing the location of all the state's railroads, highways, and pipelines. Also in series is a stock journal of the San Diego, Riverside, and Los Angeles Railway.
For a description of each individual item see P.U.C. Map Book.

39. MAPS, BLUEPRINTS, AND CHARTS RELATING TO UTILITIES. 1911-1929.

Physical Description: 100 Items.
Scope and Content Note
See P.U.C. Map Book.
