Gold mines and mining--California--El Dorado County
Gold mines and mining--California--Mono County
Gold mines and mining--California--Nevada County
Gold mines and mining--California--Riverside County
Gold mines and mining--California--Sierra County
Mercury Mines and mining--California

Contents
Reports on mining companies, including maps, photos, and broadsides; pamphlets, attorney's briefs for court cases, and surveyor's notebooks.

History
Mercury, or quicksilver, has been mined in California since the late Mexican era. Gold mining dates back almost to the earliest European settlement of California.

Gold mining by large numbers of people began very quickly after the discovery by James W. Marshall on January 24, 1848. After the gold rush dwindled away in the 1860s, gold continued to be mined in California. Gold has been discovered in 52 of the present 58 counties of the state. This collection includes mining materials from El Dorado, Mono, Nevada, Sierra, Siskiyou and Riverside Counties.
