Preferred Citation
The Peacekeeper Rail Garrison Project Records. California State Railroad Museum Library and Archives
Acquisition Information
Gift of Lynn D. Farrar.
Biography/Administrative History
class railroads through the Association of American Railroads, defense contractors and the United States Air Force, which sought to identify locations along railroad right of way that would be suitable for MX missile launches from a train. This project relied heavily on Transport Consultants, Inc., a company which was formed by former Southern Pacific Company valuation engineer Lynn D. Farrar and Charles J. McDonald. Because of the work Mr. Farrar had done for the Southern Pacific Company Historical Cost Study, he had a great deal of knowledge about the SP lines, sidings, bridges and other structures important for this project. Other entities involved include the Association of American Railroads, the Federal Railroad Administration, the Defense Mapping Agency, the Defense Contract Audit Agency, Rockwell International, Boeing Defense and Space Group, Aerospace & Electroncis Division, and TRW Inc.
Scope and Content of Collection
Material includes reports, correspondence, project segment specifications, project cost estimates, contracts, fee schedules, computer printouts, handwritten notes, memos, maps and graphics. Subjects include descriptions of the project and the Southern Pacific Transportation Company's interaction with the various entities involved, including Lynn Farrar and Transport Consultants Inc. PRGP directed Boeing Defense and Space Group, Aerospace & Electronics Division to run a mobility test train in 1992. This train included Southern Pacific business car No. 252. General data files include a copy of the PRGP history at Southern Pacific Transportation Company and copies of some profiles. Southern Pacific valuation engineer Lynn D. Farrar arranged these materials by subjects in binders. Although the documents have now been foldered, his original order has been maintained.
