Acquisition Information
Biography/Administrative History
John "Jack" C. Davis worked for the Southern Pacific Company at the Sacramento shops for over 37 years as a draftsman, class "A", and as a technical engineer. Mr. Davis was a long time member of the Association of Railway Technical Employees (ARTE) and elected its Sacramento Chapter Chairman in 1989. See also MS 620: Association of Railway Technical Employees Collection, for more information about this organization. Jack Davis was a docent at the California State Railroad Museum for many years. He died on March 11, 2009.
Scope and Content of Collection
This collection contains files of Southern Pacific technical engineer Jack Davis pertaining to the SP's handling of freight involving oversized material, known as "high and wide loads." It includes Jack Davis' common record book (which contains useful information for completing a restrict movement form), correspondence about the construction of the R 60 line and its impact on SP's Placerville Branch, a Vice President and General Manager's letter about compliance with rules for derails, exhibit files for legal cases (which include reports requesting handling of oversize material and tables, route configuration, restriction notices and railway clearance files with restrictions), SP line clearance circular No. 83 (July 1983), procedures on how to handle high and wide loads between Roseville and Sparks, and a profile of Summit, California. The railway clearance program file contains abbreviations and a glossary to messages employed by the clearance program and a manual for the Atchison, Topeka & Santa Fe computerized clearance system. Files also include safety brochures, an SP technical employees seniority roster for the Salt Lake District (January 1, 1986), telegrams about high and wide loads, and track construction requirements from the California Public Utilities Commission. Arranged alphabetically by file name.
