Biographical Note

Known as the “father of vitamins,” Casimir Funk (1884-1967) focused his investigations into vitamins, as well as extensive research on cancer, diabetes, and sex hormones. He was the first to isolate niacin, and hypothesized that nutritional deficiencies can cause certain diseases. Born in Warsaw, he studied in Switzerland at the University of Bern. He worked at various European labs before he founded the privately-funded research institute Casa Biochemica in Paris in 1927. He immigrated to the United States in 1939, where he worked as a consultant for the United States Vitamin Corporation. In 1940 he founded and acted as president of the Funk Foundation for Medical Research.

Scope and Content

Collection composed of research notes, articles and offprints, clinical notebooks, personal and work-related correspondence, Funk Foundation materials, and a few slides/photos. Includes drafts of Funk’s autobiography, and drafts of Benjamin Harrow’s published biography of Funk. Some of the earliest material in the collection dates from the beginning of his professional career in Paris (1904-1906), but the bulk focuses on his life and career in the United States from 1939-1967. Manuscript materials are in English, French, German and Polish and the collection of published professional literature mostly in offprints and reproductions contains works in English, French, German, Polish, Russian and Spanish. Topics include: cancer, diabetes, vitamins, ulcers and hormones.

Series 4. Funk Foundation. 1947-1960

Scope and Content

This series contains: The Funk Foundation for Medical Research was incorporated in March 1947 as a non-profit organization to investigate cancer and other medical research problems. Funk appears to have continued his work and association with the U.S. Vitamin Corporation for most of the early years and the Foundation was primarily a desire to have independent laboratory space and pursue other research topics. In 1952 the Foundation moved to headquarters in West 6th St., New York. Some of the items in this series appear to be drafts of work to be released on behalf of the foundation or part of their publication endeavors.

Series 5. Reprints and articles. 1896-1967
Scope and Content

This series contains: The following series of reprint and offprint articles are in the order as received from the Burndy Library. It is difficult to tell if the order reflects the way in which these materials were organized at the Funk Foundation and/or Dr. Funk's personal library or are the result of an archivist's later arrangement. The series "Reprints of articles by others" and "Reprints of articles by colleagues" for example, appear to overlap and in some cases, duplicate each other. Folders titled "Article listings" contains two computer printouts listing articles and showing brief location codes "e.g. "Funkcoff"; "Funk3" and may be from the Funk Foundation library. The "Funk articles" group contains articles authored or co-authored by Casimir Funk. Many folders have multiple copies of the same article(s)The "Funk articles" and "Funk reprints/articles" groups contains articles authored or co-authored by Casimir Funk.
