Acquisition Information

The bulk of the material was the gift of John Morris, grandson of Samuel Morris, in 1993.

Biographical Note

Samuel Brooks Morris (1890-1962) was born in Los Angeles, California. Upon graduating from Stanford University in 1911 with a degree in civil engineering, Morris took a job as a field engineer with the North Pasadena Land and Water Company in Pasadena, California. This company was one of the private water companies that were purchased and merged to form the Pasadena Water Department (PWD). He was an Assistant Engineer in the PWD in 1912, and became Chief Engineer in 1913. He remained with the PWD until 1935. While at the PWD, he designed and built the Pine Canyon Dam, later renamed in his honor as Morris Dam. The Morris Dam was made of reinforced concrete poured 328 feet high and was dedicated by Herbert Hoover in 1934.

Morris was appointed to a civil engineering professorship at Stanford University in September 1935. In May 1936, he became the Dean of the School of Engineering. In October 1944, Morris was appointed the General Manager and Chief Engineer of the Los Angeles Department of Water and Power (LA DWP). Morris worked for LA DWP until his retirement in October 1955.

One of Morris' duties as General Manager of LA DWP was to serve on the Colorado River Board. Near the end of his tenure at LA DWP, President Dwight Eisenhower offered Morris the position of Chairman of the Board of Directors of the Tennessee Valley Authority. Morris refused the position. After his retirement from LA DWP, Morris continued to consult on engineering projects until his death on March 6, 1962.

Scope and Content

This collection contains the papers of Samuel Brooks Morris (1890-1962), a Southern California civil engineer specializing in water issues. The collection deals primarily with Pasadena and Los Angeles engineering concerns, in addition to some California and national issues, largely related to water reclamation, dams, hydrogeology, water litigation, and a wide range of related technical publications. The material consists of a highly diverse mix of manuscripts and printed materials, including correspondence, maps, notes, charts, fliers, and brochures, often interspersed within each folder. The correspondence is primarily to and from colleagues, but also includes discussion with government officials at all levels. The

collection includes a small number of photographs.

Arrangement

The collection is divided into series:

- Consulting (Boxes 1-63, Boxes 156-160, and Addenda Box)
- Employee (Boxes 64-83, Boxes 158, 161-162)
- Financial Data (Boxes 84-86)
- Legislative (Boxes 87-93)
- Memberships (Boxes 94-123, 132, 163, and Addenda Box)
- Professor (Boxes 124-127)
- Speeches (Boxes 128-129)
- Technical Data and Papers (Boxes 130-140, and Addenda Box)
- Personal (Boxes 143-152)
- Miscellaneous Items, Maps and Charts (Boxes 152-155, 164-172)
