Title: Holland Land Company Records,
Date: 1909-1953
Date (bulk): bulk 1916-1942
Extent: 11.8 linear feet
Abstract: The Holland Land Company Records (1909-1953) consist of minute books, scrapbooks, photographic materials, and other records. The Holland Land Co. was incorporated in 1916. Its operations headquarters were in Reclamation District 999, Clarksburg, California, Yolo County. During the 1920s, the Holland Land Co. owned more than fifty thousand acres in Solano and Yolo Counties. The company used equipment including clamshell dredges, ditchers, draglines, pumps, and tractors to build levees and canals and reclaim Delta marshland. The company built roads, bridges, and buildings on its land and planted a wide variety of crops. The Holland Land Co. was dissolved in 1942.
Researchers should contact Special Collections to request collections, as many are stored off site.

Language of Material: Collection materials in English
Administrative History
Operations headquarters for the Holland Land Company were in Clarksburg, California, located at the northwestern edge of the Sacramento-San Joaquin River Delta. Situated in the southeastern corner of Yolo County, Clarksburg was on the west side of the Sacramento River about fifteen miles south of and across the river from the city of Sacramento. There was no bridge across the Sacramento River near Clarksburg (until the Freeport Bridge opened in 1929), so Clarksburg area residents depended on ferryboats for river crossings. Clarksburg was also physically isolated from the rest of Yolo County by miles of tule marshes. Clarksburg, Lisbon, and Merritt Island were all part of Merritt Township, Yolo County.
During the second half of the nineteenth century, floods were a serious problem for Clarksburg area residents. They built their homes on high ground and on pilings to protect themselves from rising waters, and some lived in houseboats. Early settlers made their living by fishing, hunting wild ducks and geese, cutting wood, and doing their best to raise crops and cattle in the flood-prone Delta marshland. Roads and bridges were either in terrible condition or non-existent, so through the first two decades of the twentieth century, the Sacramento River was Clarksburg's main transportation route. Passengers and freight were carried up and down the river on the many riverboats that ran on regular schedules between San Francisco and Red Bluff. Most farm produce left Clarksburg by boat. Elk Slough along the western edge of Merritt Island was also a busy channel for barges.
In the 1860s the California Legislature passed laws authorizing the formation of reclamation districts, which were to be units of local government organized and financed by the residents of an area to build levees along the rivers to keep the water out, and to build canals in the basins to drain the seepage. In 1870, Merritt Island landowners formed the first reclamation district in Merritt Township, Reclamation District (R.D.) 150, which built eighteen miles of levees, around Merritt Island. Organized in 1877, the Lisbon District, R.D. 307, built fourteen miles of levees around land north of Merritt Island to Babel Slough. Though the levees built by these pioneering reclamation districts protected the land against some of the rising waters, the area still suffered from flooding.
It was not until 1911 that the California Legislature adopted the Sacramento Flood Control Plan. The plan called for federal and state governments, reclamation districts, and private companies to cooperate in controlling flooding in the Sacramento River. They would do this by building continuous levees along the entire length of the river, enlarging the mouth of the river, removing debris from the Sacramento and its tributaries, and creating by-passes in the Sutter and Yolo basins to divert excess water from the main channel of the Sacramento River. The large profits that could be made by reclaiming and selling fertile farm land, adjacent to the Sacramento River but protected from flooding, attracted investors to reclamation projects. Many major projects commenced circa 1911 and were completed by the early 1920s, resulting in extensive and effective flood protection for Delta land.
In 1911, Isaac B. Parsons of the Bank of Hayward began buying land in the vicinity of Clarksburg for a group of men who were to form the Netherlands Farms Company. These men petitioned for the formation of a reclamation district, and in 1913 the California Legislature created R.D. 999. Financial difficulties and the outbreak of war in Europe, led to the dissolution of the Netherlands Farms Co. on March 3, 1917.
The Holland Land Company, incorporated on May 26, 1916 with three million dollars in order to protect and profit from the investment made by the Netherlands Farms Co. By the end of 1916, the Holland Land Co. paid off the debts of the
The Holland Land Company Records span the years 1909 to 1953, but the bulk of the materials date from 1916 to 1942. The records are arranged in four series: 1. Minute Books, 2. Scrapbooks, 3. Other Records, and 4. Photographic Material. Five of the minute books were created by the Holland Land Co., and one is the work of a subsidiary, the Holland By-Pass Co. Minute books hold articles of incorporation, by-laws, annual reports, minutes of stockholders’ meetings, and other legal and financial documents. The three scrapbooks contain clippings, flyers, and other materials promoting the Holland Land Co., its properties, and California agriculture in general. The photographs contained in the Holland Land Co. Records are rich sources of information about Clarksburg, California history and land reclamation and agriculture in the California Delta region during the early part of the twentieth century. Included are numerous photographs of Clarksburg area buildings, people, crops and fields, waterways, modes of transportation, hydraulic facilities, and land reclamation and agricultural equipment. Many of the images are identified.

Related Collections

Other materials related to the Holland Land Company Records and to the history of the California Delta region may be found in the following collections at Special Collections:

Acquisition Information
Gus Olson, Jr. (Nov. 14, 1914-Nov. 22, 1990), gave the Holland Land Co. Records to the Library in December 1976. He was the son of Gus Olson, Sr. (Dec. 2, 1888-Sept. 21, 1970), and Mabel Lawlor Olson (1894-1969) of Clarksburg, California. Gus Olson, Sr., was an engineer, who moved to Clarksburg in 1914 to become Superintendent of the Netherlands Farm Co. In 1916, he became General Manager of the Holland Land Co. in Clarksburg, a position he would hold until 1941. From 1916 onward he was a member of the Board of Trustees of Reclamation District 999. Gus Olson, Sr., served as a Regent of the University of California from 1951 to 1960.

Processing Information
Melissa Tyler processed these records and created and encoded this finding aid.

Subseries 4.3. **Photograph albums 1914-1926,**

Physical Description: 3 document cases

Scope and Content Note

Includes two photograph albums and fragments of photograph albums created by the Holland Land Co. The photographs in these albums are of the same subjects as or may be duplicates of loose photographs in the Holland Land Co. records. The photographs, taken in or near Clarksburg (Calif.), Elk Slough, the Sacramento River, and the Yolo Bypass, include images of agricultural technology (e.g. tractors), boats, buildings, crops, land reclamation equipment (e.g. dredges), farms, levees, pumps, road construction equipment, roads, vehicles, waterways, and wharves.

Box: 5:1-5

**Fragments of photograph albums 1920-1922, undated,**
