Provenance/Source of Acquisition

Gift of Mae Benjamin, 1983-1997.

Dr. Benjamin's interest in and dedication to UCLA goes back to his undergraduate days on the Westwood campus. This commitment found a most generous expression in 1962 when he conveyed to the UCLA Librarian an interest in donating a collection of rare medical books of over 700 volumes. The book collection was formally accepted in 1964, presented in

honor of two of Dr. Benjamin's UCLA professors, Bennet M. Allen and Boris Krichesky. Dr. & Mrs. Benjamin maintained their support of this collection over the subsequent 30 years with an additional 200 or so volumes, plus cash contributions. The personal and professional papers followed as gifts from Mrs. Benjamin after her husband's death, with the main bulk arriving in 1993 and other deposits in 1995 and 1997. Dr. Benjamin's correspondence with booksellers concerning his purchases of rare books made up boxes 17-20 of the original deposit.

The full cataloging and listing of the Benjamin Collection of Medical History was begun immediately upon receipt and arrangement of the volumes, starting in 1963. A printed catalog of the collection was issued in 1964, with supplements added in 1966 and 1968. Preliminary sorting of the papers relating to the book purchases was begun by library staff soon after receipt of the materials.

Conservation Note

Newspaper clippings and other brittle papers have been photocopied onto permanent durable paper. Photographs, x-rays, and reproductions have been sleeved in Mylar, as have the lantern slides. 35 mm slides have been placed into archival slide pages. Microfilm and film reels are housed in acid-free boxes.

Biography

John Allison Benjamin (1906-Dec. 25, 1992), M.D., urologist, surgeon, scientist, teacher, collector of a treasure trove of rare books in the history of medicine and science, and generous benefactor, was a self-made man. Innate capability and a driving work ethic propelled him, not privileged birth or extraordinary opportunities. His intellectual drive and ambition led to contacts with men who would act as role models, mentors, and friends until he had achieved his own renown, when he in turn became a gifted and conscientious teacher and mentor.

Dr. Benjamin had wide-ranging curiosity, interests, and achievements. First he was, according to many statements and hints to be found in these papers, a superb and warmly caring clinician; his patients seem to have adored him, and younger urologists gave credit to his example long after leaving his wards. Second, he was a very good scientist, doing animal experiments to further basic urological understanding; his work in developing cinematography of the urinary tract, in both dogs and humans, was pioneering. And third, with little background except some school Latin, through sheer perseverance and many hours of self study, he became a good historian of urology and a superb book collector, fashioning a well-focused collection of rare medical & scientific works that became renowned in its field.

The professional recognition Dr. Benjamin received as clinician and scientist is well documented in the papers. He was a founder and president of the Society for Pediatric Urology, prominent in the American Urological Association and several of its regional sections, editorial board member of the *Journal of Urology*, author of many chapters and many, many papers in the literature of urology, including its history. As a book collector and benefactor he was also widely hailed. In 1964 Dr. Benjamin presented his library of over 700 volumes of classics in medicine and science to the Biomedical Library of the University of California, Los Angeles, and for many years thereafter he added priceless volumes to that collection.

John A. Benjamin was born in Salmon, Idaho, the oldest of six children in a poor and troubled household. He attended the small local schools and escaped as soon as he was ready for college, to the home of relatives in Santa Ana, California. Commuting by streetcar, he entered UCLA at its old downtown location, a member of the first class to graduate, with a B.A. in Zoology, from the new Westwood campus in 1930. Then he entered The Johns Hopkins University Medical School, maintaining himself with money he had saved from working during college, further part-time jobs, and help from his So. California relatives. He received the M.D. degree in 1934.

Urology was already his primary field of interest. During the summer of 1933 he was awarded a student fellowship by the Rockefeller Foundation, International Health Division, to study venereal disease in the Southern U.S. After graduation he interned in genitourinary surgery and gynecology with Dr. Hugh Young in Baltimore for a year, and spent the following year as general surgery intern with Dr. T.F. Riggs of Pierre, So. Dakota. Then followed urological residency training at the University of Rochester Medical Center, from 1936 to 1939.

After completion of his residency, Dr. Benjamin returned to Los Angeles to join the urology practice of Dr. E. Belt, where he stayed for two years. Elmer Belt served as a major role model -- not only as clinician and educator, but he also transferred his abiding fascination with the history of medicine and the collection of rare medical books to his young colleague. Dr. Benjamin himself stated that he owed his collecting drive to Dr. Belt's example.

Dr. Benjamin next shifted to private practice in Portland, Oregon, from 1941 to 1942. But then he received an invitation, eagerly accepted, to join the faculty of the University of Rochester School of Medicine as Assistant Professor of Urological Surgery. At this time Dr. Benjamin married his second wife, Mae McElman Benjamin, with whom he celebrated his 50th wedding anniversary a few months before his death. He continued as a full-time faculty member until 1957, then as part-time clinical professor until his retirement in 1971; during all this time he had a busy private practice.

The Benjamins moved back to So. California after retirement, but Dr. Benjamin soon grew restless with inactivity. Fortunately a professional friend grabbed the opportunity to recruit him, and in 1971 Dr. Benjamin joined the Department of Urology of the Southern California Permanente Medical Group, where he practiced for seventeen more years.

Dr. Benjamin was survived by his wife, Mae, his four children and six grandchildren.

Scope and Content

The bulk of this collection documents Dr. Benjamin's research and clinical activities, the research covering the urogenital systems of both humans and animals and historical/bibliographic topics. The papers mostly span the years from 1930 to 1988 --years of professional education and working life -- with a few earlier and later items. There are also translations, photocopies and microfilm of early classic publications, dating as far back as the 15th century. Perhaps one-eighth of all the material is concerned with the John A. Benjamin Collection of Medical History, including the correspondence with rare book dealers and with UCLA librarians from which a separate provenance database has been constructed. A smaller percentage of the material can be considered personal, concerning Dr. Benjamin's background, family, and friends.

The provenance database contains information on author, title, place and date of publication, name of the source supplying the work, the date and price of purchase, and location of the pertinent documents within the collection, for each volume for which such information could be found. This information is available from the History & Special Collections Division, UCLA Biomedical Library.

In addition to the paper documents, the collection contains well over 500 photographs, over 600 35 mm slides, over 200 lantern slides, eleven motion pictures, nine film strips, and numerous x-rays. There is also a 45 min. videotape of an interview with Dr. Benjamin sponsored by the American Urological Association which gives a wonderful capsule biography and insight into the man.

Dr. Benjamin apparently made an effort to save all his papers, including multiple drafts and multiple copies of drafts of publications under development. Some of the material is handwritten, often on small cards or scraps of paper, and his handwriting was typical of the physician writing stereotype -- i.e., illegible. If they carried no additional notes or editing, multiple copies of typescripts were discarded by the processor; the same held for multiple copies of reprints. Duplication was also avoided as much as possible among the non-print materials, although there is still some overlap of images between photographs, 35 mm slides, and lantern slides.

Organization and Arrangement

The materials were arranged by the processor into seven series:

- I. Early Study and Research (7 folders, 1930-1936)
- II. Research, Teaching, Patient Care -- Urogenital System (92 folders, 1939-1991)
- III. Research -- Historical & bibliographic (48 folders, 1940-1991)
- IV. Supporting Research Materials (73 folders, 1934-1991)
- V. The John A. Benjamin Collection of Rare Medical Books (38 folders, 1942-1993)
- VI. Personal Materials (22 folders, 1925-1992)
- VII. Nonprint Materials (ca. 500 photographs, ca. 50 x-rays, 11 motion pictures, 14 film strips, 660 35 mm slides, 206 glass lantern slides, 1 phonograph record, 1 videocassette, & 2 tie tacks, no dates). Series and subseries are arranged chronologically. The contents of boxes 1-8 and 11 are identified as "folders"; of box 9 as "film" or "film strip," etc.; of box 10 as "item." The Table of Contents preceding this section affords an overview of series and subseries.

I. EARLY STUDY AND RESEARCH

- Box 1, Folder 1 **Medical school 1930-1934**
 Scope and Content Note
 handwritten & typed class & reading notes; notice of award of M.D. degree; for certificate, see Box 9-F4
- Box 1, Folder 2 **Operative surgery 1932**
 Scope and Content Note
 descriptions of five operations and autopsies performed on dogs by JAB
- Box 1, Folder 3 **Impressions, by J. Allison Benjamin, Jr. 1933**
 Scope and Content Note
 report by JAB on summer study under auspices of International Health Division, The Rockefeller Foundation, while a medical student at Johns Hopkins University; two typescripts of successive drafts, edited
- Box 1, Folder 4 **"The third ventricle: conformation of the floor and its relation to the meninges" 1934**
 Scope and Content Note
 reprint of article by Curt P. Richter and JAB, *Archives of Neurology and Psychiatry* , 31:1026-1037, May 1934; mounted illustrations
- Box 1, Folder 5 **"Ligation of the common bile duct in the rat: anatomic and behavior- istic effects" 1934**
 Scope and Content Note
 reprint of article by Curt P. Richter and JAB, *Archives of Pathology*, 18:817-826, Dec 1934; used and unused illustrations
-

Box 1, Folder 6 **"The occurrence of pigment in the pars intermedia and pars tuberalis of the hypophysis, and in the hypophyseal leptomeninges of the rat (domestic and wild)" 1935**
Scope and Content Note
typed draft and reprint of an article by JAB, *Anatomical Record*, 61(3):331-339, Feb. 1935; handwritten notes; two reprints, on meningitis and pigmentation in rat hypophysis, from 1932; photographs mounted as three plates, plus two unmounted photographs; issue no. 248 of *The Wistar Institute Bibliographic Service Advance Abstract Sheet*, Oct. 1934, which includes an abstract of JAB's article

Box 1, Folder 7 **"Appendicitis: acute and acute-perforated" 1936**
Scope and Content Note
subtitle: "Brief report of 300 cases with a consideration of the prone position to facilitate drainage," by Theodore F. Riggs, J.F. Blackman, H.C. Harrill, JAB; reprint of a presentation to the Annual Meeting of the Western Surgical Association, published in the *Transactions of the Western Surgical Association*, 46:287-295, 1936

II. RESEARCH, TEACHING, PATIENT CARE -- UROGENITAL SYSTEM

Box 1, Folder 8 **Miscellaneous correspondence 1940-1990**
Scope and Content Note
a mixture of professional and more personal letters; see also Box 7- F27 for overlapping material

Box 1, Folder 9 **Office files 1941-1942**
Scope and Content Note
folder designation by JAB; contains summaries of patients' operative histories; correspondence; notes for a lecture; notifications from the states of Colorado & Oregon to JAB granting him Basic Science Certificates [RESTRICTED]

Box 1, Folder 10 **Letters of recommendation 1976-1985**
Scope and Content Note
written by JAB

Box 1, Folder 11 **Results obtained with sulfanilamide in the treatment of gonococcal and other urinary tract infections 1939**
Scope and Content Note
typescript of a paper by Donald Forbes Marshall and JAB

Box 1, Folder 12 **"Total prostatectomy in the rabbit and intra-ocular transplantation of prostatic tissue: anatomic-surgical procedure" 1940**
Scope and Content Note
reprint & mounted illustrations of article by JAB, Elmer Belt, & Boris Krichesky, *Journal of Urology*, 44(1):109-115, July 1940

Box 1, Folder 13 **"Some side effects of sulfanilamide and its derivatives. Report of five cases" 1940**
Scope and Content Note
reprint, drafts, & illustration of article by JAB and Elmer Belt, *The Urologic and Cutaneous Review*, 44(12):786-790, Dec. 1940; correspondence

- Box 1, Folder 14 **"The value of stereoscopic pneumographic studies in the diagnosis and localization of renal and ureteral calculi" 1940**
 Scope and Content Note
 reprint & draft of article by W.W. Scott & JAB, *New York State Journal of Medicine*, 40(4):276-283, Feb. 1940; notes; numerous translations from the French & German, including articles by Von Lichtenberg, and by Rosenstein on a method of peri-renal insufflation, 1922-1923; extensive typed bibliography on pyelography, peri-renal insufflation, & related topics
- Box 1, Folder 15 **"Endocrinologic studies on the prostate gland in the male rabbit. I. The response of intra-ocular prostatic implants to testosterone propionate and to castration in completely prostatectomized animals" 1941**
 Scope and Content Note
 many draft versions plus a reprint of the paper by Boris Krichesky, JAB, Elmer Belt, and Monte Schwartz, eventually published in *Journal of Urology*, 46:303-318, 1941; notes, correspondence, and several short background papers on various aspects of prostate structure and function; for E. Belt's presentation to Urologists' Correspondence Club, 5/5/41, see letter from JAB to MTG, 8/26/66, in Box 6-F20; see also Box 1-F16 & F32
- Box 1, Folder 16 **"Response of intraocular prostatic implants in rabbit to gonadotropic hormone administration" 1941**
 Scope and Content Note
 reprint, typescript, & illustrations of article by B. Rosenberg, B. Krichesky and JAB, *Proceedings of the Society for Experimental Biology and Medicine*, 48:263-265, 1941; see also Box 1-F15 & F32
- Box 1, Folder 17 **Description of operations 1941**
 Scope and Content Note
 notes on two procedures on a named patient, dictated by JAB, surgeon, at White Memorial Hospital, Los Angeles [RESTRICTED]
- Box 1, Folder 18 **Stilbesterol-prostate-rabbit-Krichesky 1942-1944**
 Scope and Content Note
 heading from original folder, In JAB's handwriting; notes, translations from the German, correspondence with Dr. B. Bickel at the Army Medical Library; see also Box 1-F15 & F16
- Box 1, Folder 19 **Papers on hormones and cancer 1941-1944**
 Scope and Content Note
 notes on three dog experiments, "estrogens & carcinogenic studies," 1942; extensive annotated bibliographic notes; three reprints by various authors
- Box 1, Folder 20 **"Vasitis nodosa: a new clinical entity simulating tuberculosis of the vas deferens" 1943**
 Scope and Content Note
 reprint & drafts of article by JAB, Thomas D. Robertson, John G. Cheetham, *Journal of Urology*, 49(4):575-582, Apr. 1943; correspondence; mounted illustrations
- Box 1, Folder 21 **"Inactivation of endogenous androgens by the liver in rabbits" 1943**
 Scope and Content Note
 reprint & draft of an article by B. Krichesky, JAB, & C. Slater, *Endocrinology*, 32(4):345-350, Apr. 1943; correspondence

- Box 1, Folder 22 **"Effect of gonadotropic hormones on intraocular prostatic implants in the male rabbit" 1943**
 Scope and Content Note
 reprint of an article by B. Krichesky, JAB, & B. Rosenberg, *Endocrinology*, 33(1):32-38, Jul. 1943
- Box 1, Folder 23 **Development of opaque & contrast pyelography mediums 1943 [no date- early '40s?]**
 Scope and Content Note
 extensive notes, bibliographic entries, beginning drafts for an article; circular for drug "Diodrast" and reprint of article by Albert M. Meads, "Intravenous vs. retrograde pyelography," *The Urologic and Cutaneous Review*, 44(12), 1940, which was sent by a colleague (signature unreadable); overlaps materials in Box 1-F24 and Box 5-F10
- Box 1, Folder 24 **Information on contrast media [1945?]**
 Scope and Content Note
 photostats of two articles, and two typed pages plus short bibliography titled "Radio contrast medium 'Roche' "; all enclosed in mailing envelope from Hoffmann-La Roche, 1945; overlaps materials in Box 1-F23 and Box 5-F10
- Box 1, Folder 25 **"Quantitative microchemical and spectrographic data on renal calculi and their relation to infection" 1944**
 Scope and Content Note
 reprint, drafts, & illustrations of article by H.E. Thompson, L.T. Steadman, JAB, W.W. Scott, *Journal of Urology*, 51(3):259-271, Mar. 1944; extensive notes; two reprints by Charles Pierre Mathé et al.
- Box 1, Folder 26 **"Anatomical study and clinical consideration of the fasciae limiting urinary extravasation from the penile urethra" 1944**
 Scope and Content Note
 reprint & some illustrations of article by Charles E. Tobin and JAB, *Surgery, Gynecology and Obstetrics*, 79:195-204, Aug. 1944; see also Box 4-F7
- Box 1, Folder 27 **Miscellaneous papers 1941-1960**
 Scope and Content Note
 bibliography on Hippuran(tm) ; typed copies of published papers on anatomy of paraurethral glands, by Huffman, 1948, and on diverticula of the urethra, by Davis, 1960; extensive bibliographic notes
- Box 1, Folder 28 **"Renal tuberculoma and tuberculous perinephric abscess" 1944-1945**
 Scope and Content Note
 two typescripts of article by JAB and Hobart L. Boyd, one as submitted and one edited, plus receipt acknowledgment by *Journal of Urology*; reprint, *Journal of Urology*, 53(2):265-268, Feb. 1945; mounted figures

Box 1, Folder 29

"Study of experimental urinary calculi" 1945-1948

Scope and Content Note

typescripts & reprints of a series of three articles by JAB, James G. Wilson, Alice D. Leahy (authors in differing order), published in *Journal of Urology* as follows: "I. Methods for producing and preventing calculus formation in the bladder and urethra of albino rats," 54:503-515, Dec. 1945; "II. Quantitative microchemical spectrographic, and citric acid analysis of albino rat calculi, with a preliminary apatite report," 54:516-524, Dec. 1945; "III. Persistence of stone-forming tendency in estrogen-treated male rats and its relation to diet," 56:151-158, Aug. 1948 with cover letters and other correspondence; correspondence re. chemical analysis of the stones; several illustrations, one mounted; reprint of Thompson, JAB, et al. paper; over twenty reprints by various authors, some with presentation notes; see also Box 2-F42 for another copy of paper no. II

Box 1, Folder 30

"The role of bilateral orchiectomy in the treatment of carcinoma of the prostate gland" 1945

Scope and Content Note

subtitle: "A report of 82 cases"; reprint by W.W. Scott & JAB, *Bulletin of the New York Academy of Medicine*, 21(6):307-318, Jun. 1945; notes

Box 1, Folder 31

"Continuity of the fasciae lining the abdomen, pelvis, and spermatic cord" 1946

Scope and Content Note

typescript and reprint of article by Charles E. Tobin, JAB, and John C. Wells, *Surgery, Gynecology and Obstetrics*, 83:575-596, Nov. 1946; one illustration; see also Box 4-F4, F6, & F7

Box 1, Folder 32

"Endocrinologic studies on the prostate gland in the male rabbit. II. The response of intraocular prostatic implants to estrogens in the completely prostatectomized animal, intact and castrate" 1947

Scope and Content Note

reprint & three typed versions of article by Boris Krichesky & JAB, *Journal of Urology*, 58(2):114-124, Aug. 1947; extensive notes; translations of German literature; one reprint; correspondence re. manuscript; original mounted illustrations & their galley proof; see also Box 1-F15 & F16

Box 1, Folder 33

"Endocrinologic studies on the prostate gland in the male rabbit. III. The response of intraocular autotransplants of prostate tissue to estrone and to diethylstilbesterol dipropionate in the intact and castrated completely prostatectomized animal [n.d.]

Scope and Content Note

two drafts of an article by JAB, Boris Krichesky, and Charles Slato (sp.?); for numbers I and II in the series, see Box1-F15 & F32, respectively; no indication that no. III was ever published; also extensive notes, one reprint, translations from earlier German writers

Box 1, Folder 34

Miscellaneous papers 1947

Scope and Content Note

notes, one reprint

Box 1, Folder 35

"Repair of hypospadias with free inlay skin graft" 1948

Scope and Content Note

reprint and typed drafts of article by Forrest Young & JAB, *Surgery, Gynecology and Obstetrics*, 86:439-451, Apr. 1948; reprint has pencilled annotations re. additional follow-up data; also a letter mentioning the article and asking to visit JAB's department; extensive notes; correspondence re. attempt to find portrait of Gabriel Nové-Josserand for the article; two reprints by David M. Davis

- Box 1, Folder 36 **Presentation [?] on hypospadias repair procedures [1948?]**
 Scope and Content Note
 one and one-half page typed summary bearing the note "aided in part by the Dr. Henry C. Buswell Memorial," plus bibliography; extensive notes
- Box 1, Folder 37 **"A comparative follow-up study of the therapeutic value of bilateral orchiectomy in the treatment of carcinoma of the prostate gland" 1948**
 Scope and Content Note
 reprint & some of the illustrations of an article by W.W. Scott & JAB, *Journal of Urology*, 60(4):604-611, Oct. 1948
- Box 1, Folder 38 **Urological Postgraduate Seminar 1949**
 Scope and Content Note
 transcript of lectures sponsored by the Northeastern Section, American Urological Association, Univ. of Buffalo, Jan. 3-8, 1949; JAB presented: "Congenital anomalies of the kidney," and "Continuation of anomalies of the lower urinary tract"
- Box 1, Folder 39 **"Anatomic and clinical re-evaluation of Camper's, Scarpa's, and Colles' fasciae" 1949**
 Scope and Content Note
 reprint of article by Charles E. Tobin and JAB, *Surgery, Gynecology and Obstetrics*, 88:545-559, May 1949; see also Box 4-F6 & F7
- Box 1, Folder 40 **"Chronic prostatitis and seminal vesiculitis" 1949**
 Scope and Content Note
 reprint of section by JAB in: *A Textbook of Surgery*, ed by Frederick Christopher. 5th edition. Philadelphia: W.B. Saunders, 1949. pp. 1 287-1291
- Box 1, Folder 41 **"Radioactive phosphorus (P32) used to study phosphate exchange between urine in the renal pelvis and renal calculi containing phosphate" 1949-1950**
 Scope and Content Note
 three typed drafts and reprint of an article by JAB, William F. Neuman, Herbert E. Thompson and Christine Waterhouse, *Science*, 111(2888):498-499, May 5, 1950; with a cover letter and four photographs mounted on cardboard
- Box 2, Folder 1 **Genetic hypospadias 1949-1969**
 Scope and Content Note
 reprints of articles by: Forrest Young and JAB, "Preschool age repair of hypospadias with free inlay skin graft," *Surgery*, 26(3):384- 404, Sep. 1949; John M. Hamilton, 1969; and Norman B. Hodgson, ; handwritten and typed notes on patient x-ray movies; a letter of consultation from JAB on a patient x-ray movie study, 1968 [RESTRICTED]

Box 2, Folder 2	<p>Dog reflux studies, x-ray movies 1950s</p> <p>Scope and Content Note</p> <p>three manuscripts: 1. typescript of "The value of stereoscopic pneumopyelograms in the diagnosis and localization of renal and ureteral calculi," by W.W. Scott & JAB, two versions (see related reprint, Box 1-F14); 2. typescript and reprint of "Studies on the isolated dog ureter. The pharmacological action of histamine, levarterenol, and antihistaminics," by Philip S. Chen, Jr., Victor M. Emmel, JAB, Victor DiStefano; 3. two drafts and reprint of "Cinefluorographic studies of bladder and urethral function," by JAB et al.; 1956 annual report of James Picker Foundation for Radiological Research, listing JAB & J.S. Watson as grant recipients for cine studies; many pages of bibliographic notes & annotations; typed copies of part of a 1950 article on physiology of micturition, and from a 1680 (?) description of removing one kidney from living dogs [see Box 3-F24]; research notes, including lists of patients; notes for Pediatric Grand Rounds, 1957; list of past, present, and future research accomplishments of Dept. of Surgery, Division of Urology, [Univ. Rochester Medical School]; line drawings of aneurysm in renal artery [RESTRICTED]</p>
