Title: James O. Page papers
Collection number: 461
Contributing Institution: UCLA Library Special Collections
Language of Material: English
Physical Description: 40.2 linear ft. (93 document boxes and 3 record carton boxes)
Date (bulk): Bulk, 1970-1995
Date (inclusive): 1949-2004
Abstract: This collection gathers the papers of James O. Page, the "father of modern EMS" which span nearly a half century of active service in the fire and Emergency Medical Services fields. The material is separated into two main bodies: Page's personal papers and library, organized by his standards and according to a system of his devising, and the papers and library compiled and organized concurrently with his directorship of the Advance Coronary Treatment (ACT) Foundation. The material spans the length of Page's career, from the 1950s to his death in 2004, and collectively forms a detailed picture of the development of the field of emergency medical services, through the efforts and research of one of its most influential proponents.

Physical Location: Stored off-site at SRLF. Advance notice is required for access to the collection. Please contact the History & Special Collections for the Sciences (UCLA Library Special Collections) public services desk for paging information.

Restrictions on Access
COLLECTION STORED OFF-SITE AT SRLF: Open for research. Advance notice required for access. Contact the History & Special Collections for the Sciences (UCLA Library Special Collections) public services desk for paging information.

Restrictions on Use and Reproduction
Property rights to the physical object belong to the UCLA Library Special Collections. Literary rights, including copyright, are retained by the creators and their heirs. It is the responsibility of the researcher to determine who holds the copyright and pursue the copyright owner or his or her heir for permission to publish where The UC Regents do not hold the copyright.

Provenance/Source of Acquisition

Processing Information
Portions of this collection were processed by Christopher Anderson, in consultation with curator Russell Johnson, prior to 2014; this activity was made possible with funding from the James O. Page Foundation. Processing was completed by Lori Dedeyan in 2014 in the Center for Primary Research and Training (CFPRT), with assistance from Jillian Cuellar. The processing of this collection was generously supported by Arcadia funds.

Biography/History
James Page was born on August 7, 1936 in Monterey Park, California, where he first worked as a firefighter before joining the Los Angeles County Fire Department in 1959. His first assignment for the county was at Fire Station 11 in Altadena, where he worked as an Engineer (today called a Fire Fighter Specialist) until testing for and being promoted to the position of Fire Captain in the Agoura area. While working in this capacity, Page was also pursuing an undergraduate, and later, law degree, which he received from Southwestern Law School in 1970. He passed the California State Bar exam a year later. During this time, Page was transferred to Fire Station 7 in Hollywood and became principally involved in the implementation of the department’s countywide paramedic program. It was also during this time that Page's station was visited by one of the producers of what would later become Emergency!, a television program based on the department’s paramedic rescue program. Page became the lead technical advisor for the program until 1973, occasionally contributing written material through Writer’s Guild sponsorships. The show's success helped catalyze the incorporation of emergency medical service units as a standard feature of fire services. In 1972, Page was certified as an Emergency Medical Technician (EMT).

Page left California in 1973 to pursue projects in the Eastern US, becoming director of the North Carolina Office of Emergency Services, where for two years he implemented the state legislature’s plan for a statewide EMS system. In 1975, he became executive director of the federal grant-funded Lakes Area Emergency Medical Services project in upstate New York. In 1976 he became the executive director of the Advance Coronary Treatment (ACT) Foundation, a national non-profit...
health education organization; he continued in this position until 1983. In 1979, Page founded JEMS Communications, an enterprise that would encompass several newsletter and magazine publications, primarily the Journal of Emergency Medical Services (JEMS), for fire and emergency services personnel. The publication represented a labor of love for Page, who continued to devote his time and resources towards its maintenance and distribution until his retirement in 2001, when he was given the title of Publisher Emeritus. Also within the Communications umbrella was EMS Today, an annual series of national fire and EMS educational conferences which continues to this day, as does the publication itself.

In 1981, Page became manager of the Technical Support Services Program of the U.S. Fire Administration (part of the Federal Emergency Management Agency), a national consulting and technical assistance program for fire and emergency service agencies. Returning to California in 1984, he served as the Battalion Fire Chief for the city of Carlsbad until 1986, when he transitioned to a position as Fire Chief for the city of Monterey Park. In 2000, he left this position to become a partner at Page, Wolfberg and Wirth, LLC, a national law firm specializing in emergency medical services reimbursement and regulatory issues. In that same year, he served as volunteer executive director of Project 51, a non-profit project in honor of the television series Emergency!, for which he had consulted in the seventies. This effort culminated in a national tour and the induction of artifacts from the show into the Smithsonian Institution’s National Museum of American History.

In 1997, he became president of the board of directors for the County of Los Angeles Fire Museum Association. The 1947 Ford “Rescue 11” truck he first drove as a firefighter in Altadena, which he restored personally, now resides in the Fire Museum. Page’s good humor is evidenced in a scrapbook chronicling his cross-country travels in the truck, which can be found in the collection.

Throughout his career, Page provided his services as an attorney to members of the fire and emergency medical services. In addition to his work as an educator, he was a frequent speaker at conferences, symposia and other events; the collected materials from his lectures and talks in his papers attest to his incredibly busy schedule as a proponent of, and consultant for, EMS issues.

**Scope and Content**

This collection contains a variety of materials related to EMS and fire service paramedic programs. Page’s personal papers include correspondence, contracts, notes and manuscripts, and various publications. The material related to his speaking engagements, such as correspondence, notes, lecture materials, programs, financial agreements and other preparatory documentation, provides a precise chronological picture of his activities as a lecturer, educator, editor, and public advocate, and documents the development of EMS through the activities of its participating entities. Included in the libraries are documents generated at the local, state, and federal level, as well as by various regional and professional councils and public interest groups; legal, medical, and administrative literature; textbooks and training material; manuals; newsletters and journal articles. Also included is a collection of audiovisual materials, from commercial video tapes to live and broadcast recordings. The collection spans the second half of the twentieth century, with an emphasis on the era between 1970 and 1995.

**Organization and Arrangement**

James Page kept his libraries, personal papers and other ephemera in good working order. The arrangement of this collection closely adheres to the original arrangement of the materials, with file titles, order and content preserved. The contents of this collection are divided between Page’s personal work and the work produced during his directorship of the ACT Foundation.

This collection has been arranged in the following series and subseries:

- **Series 1: James O. Page materials, 1949-2004**
  - Subseries 1.1: Speeches, Lectures and Workshops, 1973-2003
  - Subseries 1.2: Desk files and personal papers, 1949-2004
  - Subseries 1.3: Personal library of EMS literature, 1971-1990
- **Series 2: ACT Foundation materials, 1960s-1996**
  - Subseries 2.1: Speeches, Lectures and Projects, 1992-1996
  - Subseries 2.2: Photographs, 1976-1983
  - Subseries 2.3: ACT Foundation library of EMS literature, 1960s-1990

**Physical Characteristics and Technical Requirements**

Collection contains audiovisual material which must be digitized prior to use. Please contact the paging desk for more information.
Separated Material
Several books have been removed from the collection and cataloged separately. They can be searched in the UCLA Library Catalog by using the phrase “Gift of the estate of James O. Page.”

Scope and Content
The contents of this series encompass the various aspects of Page’s work, such as his service with the Los Angeles County Fire Department, his directorship of various statewide EMS networks, his television projects, his work as an educator and public speaker, his career as an author and publisher (most notably of JEMS), and his legal expertise regarding disciplinary and liability issues in EMS. Materials include correspondence; notes, manuscripts, and published material; speeches and scripts; contracts; event brochures, programs, and other ephemera; teaching materials for courses, workshops, seminars and mock trials; and a wide variety of state and federal EMS system plans, memoranda, reports and other literature relating to the administrative, financial, medical, legal, statistical and other aspects of EMS and paramedics services. Also included is a personal scrapbook of Page’s cross-country travels in his restored LA County Fire Department “Rescue 11” truck.

Scope and Content
This subseries contains correspondence, contracts, invoices, presentation materials and slides, notes and ephemera, such as brochures and event programs, relating to Page’s speaking and teaching engagements, in a variety of contexts. As an early and active proponent of EMS, Page was invited to speak at (and was sometimes involved in convening) conferences, conventions, symposia, annual meetings, award ceremonies and other regional gatherings across the country; as well, he regularly lectured and taught at seminars, workshops, and traineeship programs, and gave interviews for various programs. These engagements drew on his various areas of expertise, such as firefighting and paramedics, management, legal and disciplinary issues, program development, funding, and other issues related to EMS. Also included are materials relating to his legal work.

Organization and Arrangement
Materials in this subseries are arranged chronologically. Each event is given its own file, and these files are grouped into single-year units, representing all of Page’s engagements for that year. Each year is listed, followed by the date range of the materials associated with events from that year (correspondence, notes, financial agreements and other preparatory documentation). Materials concerning Page’s activities from 1993 to 1996 can be found in the ACT Foundation lecture materials in Series 2.1.

For a complete inventory of individual event files and their contents, please consult this PDF document.

Subseries 1.2: Desk files and personal papers. 1949-2004.

Scope and Content
This subseries contains files that Page chose to keep at hand, filed in his desk and adjacent cabinet, rather than with his ACT materials, speeches, or library collection. They are generated as a result of the various aspects of Page’s professional endeavors. Included are notes, correspondence, proposals and coursework from Page’s LACoFD days; scripts and treatments for television programs; course syllabi, curricula and lecture materials; articles, notes, correspondence and other documentation relating to Page’s work as both an individual author and as editor of the Journal of Emergency Medical Services (JEMS) and its affiliated publications; writing, slides and scripts for mock trials and other legal lectures and presentations; and material from various events and newsletter subscriptions. Also included is a personal scrapbook documenting Page’s cross-country journey in his restored LA County Fire Department "Rescue 11" truck.

Organization and Arrangement
For a more extensive inventory of file contents, please consult this PDF document.

Subseries 1.2: Desk files and personal papers. 1949-2004.

Box 49, Folder 1  Scripts and research for mock trials. 1983-1984.
Box 49, Folder 3  Interview in the Carlsbad Journal. 1985 March 13.

Scope and Content
This subseries represents James Page's personal library, which contains a diverse body of literature and documentation relating to the development of Emergency Medical Services. Included are journal articles, bulletins, and newsletters; books; state and federal reports, memoranda, legislation, system plans, and implementation strategies; training and recertification manuals, textbooks, workbooks, and examinations; indexes, directories, and bibliographies; press releases and ephemera relating to various public education initiatives; medical studies and EMS statistics; legal studies and relevant casework; communications plans and equipment brochures; administrative literature; conference programs; and funding and grant proposals.

Organization and Arrangement
EMS Library books and documents are numbered according to a system devised by Page. Researchers interested in accessing the documents should first consult the index in Box 50, which will direct them to the relevant numbered documents according to the desired subject. Document ranges are listed for each box, followed by the date ranges of the material.

Though Page used an alphanumeric identification system, its nuances were not apparent in any existing documentation; therefore, we have used a strictly numeric notation below, for the sake of clarity.

The subject list for the library is attached as a PDF document. Please consult this document to determine whether these subjects are consistent with your areas of interest.

Box 50, Folder 1  Index. 1971-1990.
Box 50  Documents 0000- 0603. 1981-1990.
Box 54  2972- 3654. 1979-1989.
Box 56  3675- 3687. 1982-1986.
Box 62  6036- 6055. 1984-1990.
Box 63  6056-6941. 1979-1990.

Scope and Content
The contents of this series encompass the many of the same aspects of Page's work as Series 1, as they were carried out concurrently with or in relation to his directorship of the ACT Foundation. Included are various types of documentation related to his speaking and teaching engagements, and material from the EMS library and rudimentary photographic archive created and compiled by the ACT Foundation during his directorship.

Scope and Content
This subseries contains correspondence, contracts, invoices, presentation materials and slides, notes and ephemera relating to Page's speaking and teaching engagements, and material relating to his legal activities collected under the aegis of the ACT Foundation.

Organization and Arrangement
Materials in this subseries are arranged chronologically. These files complete the three-year gap, from 1993 to 1996, in Series 1.1.

Box 42, Folder 12

Scope and Content
This subseries represents the ACT Foundation library. The material roughly spans the years of Page's directorship of the foundation, dropping off sharply in 1983. The ACT library includes journal articles, bulletins, newsletters and newspaper clippings; books; state and federal reports, memoranda, legislation, system plans, and implementation strategies; training and recertification manuals, textbooks, workbooks, and examinations; various types of sample forms; indexes, directories, and bibliographies; press releases and ephemera relating to various public education initiatives; medical studies and EMS statistics; legal studies and relevant casework; communications plans and equipment brochures; administrative literature; conference programs; photographs; Page's correspondence; and funding and grant proposals.

Organization and Arrangement
EMS Library books and documents are numbered according to a six-digit identification system devised by the ACT Foundation. Document ranges are given for each box, followed by the date range of the materials. Researchers interested in accessing the documents should first consult the library index in Box 64, which will direct them to the relevant numbered documents according to the desired subject, and provide further explanation about this system.

The subjects covered by the materials in this library are listed in the first three pages of the index, which are provided as a PDF. Please consult this document to determine whether these subjects are consistent with your areas of interest.

Scope and Content
This series contains commercial recordings (instructional videos), administrative or informational videos, broadcast recordings (television programs, public service announcements, corporate advertisements and marketing videos), and live recordings of conferences and lectures. Some are issued by the ACT Foundation.

Physical Characteristics and Technical Requirements
Formats include VHS, U-matic, and Betamax cassettes; compact audio cassettes; 1/4-inch open reel audio tape; film stock; and 16mm film reels. Video cassettes (VHS, U-matic and Beta) comprise the majority of this series, and items can be considered as such unless otherwise noted. Some materials may need to be digitized prior to research use. Please contact the reference desk at Library Special Collections for more information.

Organization and Arrangement
Items are listed alphabetically. Broadcast recordings are grouped together, as are live recordings.
