Descriptive Summary
Title: Wells A. Hutchins Papers,
Date (inclusive): 1917-1967
Collection number: MS 79/6
Creator: Hutchins, Wells A. (Wells Aleck), 1888-1970
Extent: 15 linear ft. (13 cartons)
Repository: Water Resources Collections and Archives
Riverside, CA 92517-5900
Shelf location: This collection is stored off-campus at NRLF. Please contact the Water Resources Collections and Archives staff for access to the materials.
Language: English.
Access
Collection is open for research.

Publication Rights
Copyright has not been assigned to the Water Resources Collections and Archives. All requests for permission to publish or quote from manuscripts must be submitted in writing to the Head of Archives. Permission for publication is given on behalf of the Water Resources Collections and Archives as the owner of the physical items and is not intended to include or imply permission of the copyright holder, which must also be obtained by the reader.

Preferred Citation
[Identification of item], Wells A. Hutchins Papers, MS 79/6, Water Resources Collections and Archives, University of California, Riverside.

Arrangement
Papers organized into four sections:
I. Published and unpublished writings of Hutchins.
II. Conference papers and other public addresses.
III. Correspondence.
IV. Report and other research materials grouped by state.

Scope and Content
Correspondence, writings, speeches, and report materials. Hutchins served for 62 years in various bureaus and offices of the U.S. Dept. of Agriculture; his major work dealt with water laws and water rights in the Western States. He also lectured on water law and institutions at the University of California.

Access Points

Irrigation laws -- West (U.S.)
Water -- Law and legislation -- West (U.S.)
Irrigation -- Economic aspects -- West (U.S.)
Water districts -- Law and legislation -- West (U.S.)
Drainage -- Law and legislation -- West (U.S.)
Groundwater -- Law and legislation -- West (U.S.)

Biography
Wells A. Hutchins, a nationally recognized authority on Western water laws, had completed over 62 years of service with the Department of Agriculture at the time of his death in Berkeley, California, on September 19, 1970. As an employee of Natural Resource Economics Division, he was completing the final draft of his comprehensive, multi-volume work, State Water Rights Laws of the Nineteen Western States.

Mr. Hutchins began his government career in 1908, when he joined the Department of Agriculture's Bureau of Soils as an irrigation economist. Over the years he worked with a number of other agencies in the Department, including the Office of Extension Service, Office of Public Roads and Rural Engineering, Bureau of Public Roads, Bureau of Agricultural Engineering, Soil Conservation Service, and lastly, Economic Research Service and predecessor agencies. After reaching retirement age in 1958, following nearly 50 years of Federal service, Mr. Hutchins was reemployed each year so that he could complete his important book on the law of water rights in the Western States. He received recognition for 60 years of Federal service in 1968. The occasion was marked by special recognition from the Secretary of Agriculture.

Mr. Hutchins wrote dozens of books, papers, and articles on water laws and water rights in the Western States. His Selected Problems in the Law of Water Rights in the West has been a classic in its field since 1942. Another major work, California Law of Water Rights, has been widely acclaimed as a masterpiece of exposition and analysis. He also wrote studies of water laws of Hawaii, Nevada, New Mexico, Oklahoma, Idaho, Kansas, Montana, Texas, and Utah. He helped many states draw up improved water laws and in the 1940's served as chairman of the National Reclamation Association's committee to formulate desirable water law principles for the West. He also lectured on water law and institutions at the University of California at Davis and Berkeley.

Introduction
Wells A. Hutchins's eminent career with the Department of Agriculture culminated with the publication of "Water Rights Laws in the Nineteen Western States," a three-volume work which began to appear a year after his death in 1970. The collection of primary materials described in this key was amassed over a period spanning approximately half a century, and it includes much of the data used in Water Rights Laws in the Nineteen Western States. It also includes Mr. Hutchins's own earlier publications and addresses, work-related documents, and correspondence. Altogether this collection amounts to thirteen cartons of materials. Most of the printed materials collected by Hutchins in the course of his work are not described in this key; they are, however, cataloged into the collection of the Water Resources Collections and Archives (Berkeley) and can be accessed through the card catalog at the Archives.

The collection has been organized into five sections. The first section contains both published and unpublished writings by Hutchins; the published materials include virtually all of the works cited in Hutchins's own listing of publications (see File No. 1), with only a few exceptions. Variant states of many of these works, such as type-written drafts, proofs, and reprints, are also found here. The items are in alphabetical order by title.

The second section contains Hutchins's prepared public addresses. These are, for the most part, papers read at various conferences and meetings. Some were published and others are closely related to separate publications found in the first section. These also are arranged alphabetically by title.

A vast amount of correspondence occupies the third section of the collection. Many items of small significance, such as requests for publications and acknowledgements of publications received, are to be found here. Some important documents, however, are also present; these deal with questions of law, the drafting of legislation, the development of
publications, Hutchins's personal affairs, etc. This correspondence serves to supplement materials found in other sections. The arrangement of correspondence dealing with water law is alphabetical by state; other correspondence is grouped by specific topic. Within each folder, the correspondence is placed chronologically.

The fourth section contains research materials bearing on water law in the West. Items here are in order by state and are then further gathered into one of six possible categories, as follows:

I. Laws, statutes, legislative bills, court proceedings
II. Agency rules, regulations, by-laws, articles of incorporation
III. Articles, circulars, reports, newspaper clippings, memoranda, conference proceedings, etc.
IV. Maps, sketches, photographs, diagrams, tables
V. Hutchins's notes, drafts, summaries, manuscript corrections
VI. Miscellaneous items

Not all states have items for all categories and, consequently, numbering of sub-sections (I-VI) is not always consecutive. Arrangement within categories is chronological except in certain instances (e.g., Valmont case, #472A-S) where it appeared advisable to follow a single proceeding through.

The final section of the collection contains general and/or miscellaneous items not included in the other sections. It is divided into the same categories as those for the individual states in the fourth section.

Throughout sections three through five of the collection, loose items which were initially attached together with paper clips (presumably by Hutchins) have been stapled together in order to preserve their integrity. An *item*, in collation statements, refers to a single unit: either one document or a number of documents which are attached. For example, a folder of correspondence which contains *9 items* could conceivably have 20-30 documents gathered into nine bundles. This may be useful to remember.
