Descriptive Summary

Title: Omar J. Lillevang papers

Date (inclusive): 1905-1990 (bulk 1955-1975)

Collection Number: WRCA 210

Extent: 17 manuscript boxes1 oversized box

Repository: Rivera Library. Special Collections Department.
Riverside, CA 92517-5900

Abstract: Project files and technical reports of Consulting Coastal Engineer Omar J. Lillevang.

Languages: English.

Provenance
Collection donated to the Water Resources Collections and Archives in 2000 by Lillevang’s estate; donation arranged by Fredric Raichlen.

Access
Collection is open for research.

Publication Rights
Copyright has not been assigned to the Water Resources Collections and Archives. All requests for permission to publish or quote from manuscripts must be submitted in writing to the Director of Distinctive Collections. Permission for publication is given on behalf of the Water Resources Collections and Archives as the owner of the physical items and is not intended to include or imply permission of the copyright holder, which must also be obtained by the reader.

Preferred Citation

Biography
Omar Johansen Lillevang was born on September 8, 1914. He graduated from the University of California, Berkeley in 1937 with a Bachelor of Science degree in Civil Engineering. Under the direction of Morrough P. O’Brien, Lillevang was introduced to coastal engineering and wrote his senior thesis on two sand movement and shoaling model studies (Santa Barbara and Santa Monica, California). His specialty during his long engineering career was in the design of nearshore sited armored structures constructed of material ranging from stone to special concrete armor units.

From 1938 until 1943, Lillevang worked with the firm of Quinton, Code and Hill-Leeds and Barnard, involved in the practice of civil engineering. During World War II (1943-1946), he served as a diving and marine salvage officer with the U.S. Naval Construction Battalions, the Seabees, on the South Pacific. In 1946 he joined the staff of the Los Angeles consulting engineering firm of Leeds, Hill and Jewett, the same firm that he had worked for before the war. The firm provided engineering services generally related to private, corporate, and governmental entities with the responsible engineer on each project usually also in direct charge of construction surveillance. Lillevang served as Senior Engineer and Project Engineer on a wide variety of the firm’s projects. In 1960, he became Vice President in charge of the firm’s coastal and harbors works. In 1964, he left Leeds, Hill and Jewett and began practicing independently as a consulting civil engineer specializing in coastal engineering. One of Lillevang’s primary objectives throughout his 30 years of private practice was to avoid office growth so that he could remain directly involved in all aspects of a project from preliminary to final design.

During his career, Lillevang was involved in the conceptual and final design of nearly twenty breakwaters constructed from stone or special concrete shapes. His direct involvement in physical model studies of more than half of these provided Lillevang with a unique approach to marine structure design using the model study results as a design tool. A major effort for a number of years dealt with the design and subsequent upgrade of the breakwaters of the Diablo Canyon Nuclear Power Plant of the Pacific Gas and Electric Company. Prior to this engagement he was involved in coastal aspects of several other nuclear power plants, including San Onofre Nuclear Power Plant for the Southern California Edison Company, and the initial design of an artificial island for a nuclear power and sea water conversion plant for the Metropolitan Water District of Southern California.

Lillevang’s coastal engineering expertise often was sought overseas as well as in the United States. He was actively engaged in projects in Hong Kong, Israel, New Zealand, Peru, Mexico, Canada, and South Africa. He was a professional engineer registered in California and several other states. He was a Fellow of the American Society of Civil Engineers, a member and Director of the American Shore and Beach Preservation Association, and a member of the Permanent International Association of Navigation Congresses, the United States Power Squadrons, and the Society of American Military Engineers. In 1980, Lillevang was the recipient of the ASCE’s John G. Moffatt-Frank E. Nichol Harbor and Coastal
Engineering Award.

Collection Scope and Contents
Collection consists of Omar J. Lillevang's project files, compiled during the course of his career as a consulting engineer, and technical reports and specifications. Project files consist of correspondence, reports, drawings, blueprints, data, photographs, etc. Technical reports consist of documents written by Lillevang, and documents collected by Lillevang on a variety of topics. Project locations are primarily Southern California, but other parts of California and international locales are included as well.

Collection Number
Collection number updated February 2019. Legacy collection number was MS 2000/1. This change was part of a project in 2018/2019 to update the collection numbers for collections in the Water Resources Collections and Archives.

Indexing Terms
The following terms have been used to index the description of this collection in the library’s online public access catalog.
Subjects
Leeds, Hill, and Jewett
Leeds, Hill, Barnard, and Jewett
Breakwaters -- Design and construction
Coastal engineering
Electric power-plants -- Design and construction
Harbors -- Design and construction
Marinas -- Design and construction
Nuclear power plants -- California -- Design and construction
Sewage disposal -- California, Southern
San Onofre Nuclear Generating Station (Calif.)

I. Project Files 1905-1990 1955-1975
Scope and Contents
Correspondence, reports, blueprints, drawings, data, photographs, etc. Arranged alphabetically by Lillevang's project designation.

Box 17, folder 17-7
Southern California Edison Co., Engineering Dept. Proposed modification of the Oxnard drainage ditch within the U.S. Naval Construction Battalion Center at Port Hueneme, California. Los Angeles, March 1957.

Scope and Contents
"Design specification no. D57-33."

Box 17, folder 17-9
Third progress report to the Legislature, 1965 Regular Session, by the Senate Permanent Factfinding Committee on Natural Resources. Sacramento, 1965.

Scope and Contents
Includes: Appraisal of the California Boating Plan as prepared by the firm of Leeds, Hill, and Jewett for the Small Craft Harbors Commission and the Division of Small Craft Harbors.

Box 17, folder 17-10

III. Oversized Items

Scope and Contents
Items in this series consist mostly of blueprints and blue line prints. They were originally filed within Series I: Project Files. A separation record has been made to mark the original location of each blueprint within its respective folder, and each blueprint has been labeled with the number of its originating folder.

Box 18, folder 1
Oversized materials.
