Biography / Administrative History

Garrett Hardin was a professor of Human Ecology at the University of California, Santa Barbara, from 1946 to 1978. An author and lecturer concerned with the ethics of overpopulation and population control, he is best known for his essay *The Tragedy of the Commons* (Science, 1968). He wrote on and publicly supported birth control and eugenics (including abortion and sterilization), conservation, ending of foreign aid, and restriction of immigration as solutions to overpopulation. Hardin was born in Dallas, Texas, in 1915. He contracted polio at the age of four, leaving him dependent on crutches and, in his later years, wheelchair bound. Nonetheless, he excelled in swimming, and from an early age was recognized for his success in academics as well as theater and public speaking. He obtained a Bachelor of Science degree from the University

of Chicago in 1936 and a Ph.D. in Biology from Stanford University in 1941. He worked at Stanford until 1946, when he left to take an assistant professor position at UCSB. He remained at UCSB until he retired with the title of professor emeritus in 1978. He continued to actively write at his home in Santa Barbara, authoring several new books and articles as well as revising existing titles. Hardin also remained active in the Federation for American Immigration Reform (FAIR).

Hardin's publications began with a textbook entitled *Biology: Its Human Implications* (1949-1978). His best known writings on overpopulation include: *Nature and Man's Fate* (1959), *Population, Evolution and Birth Control* (1964), and *Managing the Commons* (1977). Hardin also wrote about the ethics of birth control and abortion in books such as: *Birth Control* (1970), *Exploring New Ethics for Survival* (1972), *Stalking the Wild Taboo* (1973), *Mandatory Motherhood: The True Meaning of "Right to Life"* (1974), *The Limits of Altruism* (1977), and *Promethean Ethics: Living with Death, Competition and Triage* (1980). Other titles published after his retirement include *Filters against Folly* (1985), *Living Within Limits* (1993), *The Immigration Dilemma* (1995), and *The Ostrich Factor* (1999). At the time of his death Hardin was also working on two additional monographs: *Saved by Reason* and another unidentified monograph.

Garrett Hardin's many awards include the UCSB Faculty Research Lectureship (1968), the Constantine Panunzio Distinguished Emeriti Award (1997) for outstanding scholarly work after retirement, and many honorary degrees. He was a visiting professor at many universities across the country, including the University of California Berkeley, Cornell University, and the University of Notre Dame.

Garrett Hardin died in September 2003 at age 88 in Santa Barbara, California.

The Garrett Hardin Society maintains a webpage with extensive information about Hardin, his life, career, and a bibliography of his writings. Go to: <http://www.garretthardinsociety.org/>

Scope and Content of Collection

The collection contains the following series:

I. General. Includes biographical and bibliographical information. Also includes oral history from the Federation for American Immigration Reform (FAIR).

II. Correspondence. Mainly arranged by year. Some files for particular correspondents are separated. Correspondents include: Paul Ehrlich, Joseph Fletcher, Dan McKinley, Gerry Mackey, Cordelia May, John Tanton, and Walter Youngquist.

III. Subject Files. Divided into numbered (by Hardin) and unnumbered files. Unnumbered files include significant files on Abortion and the Environmental Fund. Numbered subject files were created and organized by Hardin, including essays, correspondence, and notes, covering a wide range of topics about which he wrote.

IV. Teaching Files. From Biology 123 at UCSB, 1965-1977. Also see numbered subject file for 57.Education.

V. Writings. Handwritten and typewritten drafts, proofs, correspondence, and reviews of monographs. Also includes drafts of articles, written versions of addresses, speeches, statements at hearings, sermons given at the Unitarian Church. Other shorter pieces include book reviews, editorials, forewords, open letters, and letters to editors.

VI. Chronological Files. "Works In Progress", mainly unidentified manuscript drafts of articles and chapters of books, arranged roughly chronologically; usually handwritten, with notes to the typist; some correspondence also interspersed, ca. 1963-2003.

VII. Notebooks. Includes notebooks starting from Hardin's Stanford years extending through the 1980s. Includes research notes and writing drafts. Early notebooks include lecture notes and early contemplations on ethics and population.

VIII. Photographs. Primarily personal and publicity photos.

Monographs, chapters in anthologies, and other printed works are cataloged under the title of the work and can be searched on Pegasus, the UCSB Libraries online catalog. Articles and book reviews can be search through our databases, such as Expanded Academic ASAP and JSTOR.

Arrangement

Correspondence is primarily arranged chronologically and then alphabetically, except where Hardin had separated specific files for particular correspondents. Hardin's arrangement is preserved in his subject files. His writing files are arranged alphabetically by title.
