Scope and Contents
This is an artificial collection of nearly 300 audio recordings (mostly on 1/4" reel to reel tape) of various interviews, lectures, and public events related to the University of California, Santa Cruz. Some recordings have been re-formatted and cataloged individually (call numbers, beginning with "LCD" are included in the listing). The recordings have been listed in chronological order (if known) along with any identifying information including lecture title and speaker. Uncataloged recordings have not been played so identifying information is based on the respective labels on each physical item. These recordings will need to be reformatted prior to access. Contact Special Collections at speccoll@library.ucsc.edu for information regarding access.
